

This edition of the Perforator deals almost exclusively with the the planned new Perfin Handbook. This is to provide you with the general results of the questionnaire on the Handbook issued two months ago so you can see what most of the collectors are interested in (unfortunately there is not enough space for all the comments which you added to the general questions. You can give some thought to the results. Although to the odd collector the quantity of questionnaires may seem quite large, Gary Tomasson informed me that at this rate the research for the revised Handbook will be completed in April or May, 1982. That is only one year away!! This means that all the checklists will have to be completed at this time as well. To start, below is a suggested Table of Contents for the Handbook. On the reverse is a suggested format for each perfin type listed in the Handbook (perfins with code pins will each be photographed with pertinent information). Any specific comments on these should be directed to the Chairman.

Jon Johnson.
