

PRECANCELS/CANADA

WHOLE NUMBER 3 • WINTER, 2001

HANS REICHE, M.SC., P. ENG., F.R.P.S.C., F.C.P.S. (G.B.)

by James E. Kraemer, F.R.P.S.C., F.R.P.S.L, O.B.

The philatelic community was shocked and saddened to learn of the death of Mr. Hans Reiche in Ottawa on September 29, 2000. Mr. Reiche had enjoyed good health over the years until he was hospitalized this summer in July. A quiet, friendly well respected gentleman and an outstanding philatelic writer, he will be greatly missed by his many friends and readers.

Hans leaves to mourn his beloved wife of many years, Sylvia Schachet, one sister, Eva (Reiche) Bergmann and her husband Fred Bergmann of Jamaica, New York. Hans was an uncle to Peter and Ronda Bergmann. Mr. and Mrs. Reiche had no children. Hans Reiche was a prolific writer. His regular column, "Postmarked Ottawa", has appeared for many years in *The Canadian Philatelist*, the official publication of the Royal Philatelic Society of Canada. Over the years, he authored or co-authored 24 handbooks on philatelic subjects. He has also written more than 500 articles for various philatelic journals. Hans had a deep interest in the stamps of Germany, particularly the Old German States. His collection of Canada precancels is considered as being one of the most complete in the world. His interest in Canada's Admiral stamps and in Canadian postal history was well known. Hans also collected the stamps of Switzerland and the U.S.A. Mr. Reiche was appointed a Fellow of the Canadian Philatelic

Society of Great Britain in 1979 and was named a Fellow of the Royal Philatelic Society of Canada in 1982.

An engineer by profession. Hans graduated with a Master of Science degree in electrical engineering from the Berlin Technical University in 1936. Later, in the 1950's, he completed postgraduate studies at McGill University in Montreal, Canada.

In 1939, Mr. Reiche emigrated to England and worked at Chelmsford, Essex as a senior electrical engineer. In 1940, he was sent to Canada on the S.S. Ettrick and was housed as a "friendly alien" in camps at Monteith, Ontario and Sherbrooke, Quebec. In 1941, Dr. Albert Einstein interceded with the Canadian government on his behalf. By a special order-in-council, Mr. Reiche was given a classified position at the National Research Headquarters as a design engineer. He soon became a Systems Engineer and Advisor on drone missiles and radar. In the 1970's, Hans headed the engineering and maintenance section on policy and procedures for National Defence. Mr. Reiche retired in 1981 and became a consultant in Reliability and Maintainability engineering. He co-authored the book, "Reliability and Maintainability of Electronic Systems", with Professor B. Dhillon of Ottawa University. As the Canadian representative on the International Electrotechnical Commission, he

authored many engineering papers. He presented lectures in the U.S.A., France, Israel, England and the Netherlands.

Hans Reiche was born in Berlin, Germany on November 28, 1914. He was a son of Dr. Fritz Reiche, a physicist and a close friend of Dr. Albert Einstein. Fritz Reiche was the assistant to Max Planck, a leading German scientist and taught theoretical physics at the University of Breslau. Later, in 1941, after escaping from Germany, he was a professor at the School of Social Research in New York. Hans' mother was the former Bertha Ochs, a daughter of Professor Siegfried Ochs, well-known composer, founder and conductor of Berlin's Philharmonic Choir.

Hans Reiche possessed a quiet, positive nature. He was a gentleman that anyone would be proud to know. There is no doubt that Hans has greatly influenced philately on both sides of the Atlantic, he advanced philatelic knowledge immeasurably. Hans Reiche's legacy will be the results of his research as expressed in his many papers and handbooks. He will be recognized as authoritative for many years to come.

Our heartfelt sympathy is extended to Mrs. Reiche and to the Reiche family members.

**A WORD FROM
 YOUR EDITOR**

by Larry Goldberg

Apologies. You will probably receive this about a month late. I can't explain why this happened; I just don't know for certain. Probably, it had something to do with holidays and our five kids, their spouses, grand-children *et al* who all came to visit. Chaos was pervasive.

Hans Reiche. While my personal involvement with Hans was rather recent, I have long been an admirer of his prodigious output as a philatelic writer, another area of common interest that we shared. His contributions to this publication, the precancel specialty and philately in general will be sorely missed.

Thanks. This issue was a joy to put together because, for the first time, we have a high degree of participation from the membership.

My thanks to Bruce Fields, Rob Leigh, Allan Magee, Duncan MacDonald, John Newman, and Norm Wagner. Special thanks to Jim Kraemer for allowing us to reprint his memorial to Hans Reiche that originally appeared in *The Canadian Philatelist*.

FREE Want Ads. I am always amazed when I can't give something away that is free of charge. Our want ad section is for the use of all members. Use it to your advantage. After all, if no one knows what you want, how are they going to know to tell you when they find one? (I suppose I could rewrite that question in a less confusing manner, but I'm sure you get my point.)

Editorial. I usually don't do a lot of preaching in these

pages, but I recently wrote an editorial for another publication that I edit and thought it presented a pretty good case. Consequently, I have reprinted it here for your consideration.

EDITORIAL

**WHY ISN'T
 THERE MORE
 MATERIAL ON**

?

by Larry Goldberg

One of my most favorite epistles of the New Testament is that bearing the name of Jesus's brother, James. A favorite passage is James 4:2, which reads:

You want something but don't get it. You kill and covet, but you cannot have what you want. You quarrel and fight. You do not have, because you do not ask God.

One might very well paraphrase those same verses as they apply to philately. You do not have, because you do not take the time to either research the subject or, having done the research, publish your findings for the edification of your peers. In other words, you do not have because you do not look, or, even if you do look, you did not share.

I'm as guilty as the next person. There are things that I have investigated and never shared. I'm also one of the first guys to moan and complain about the lack of good resources.

You don't have to be a genius or a fine writer. You may not have to do more than ask a question. It could very well stimulate study on the part of others, a study in which you could offer to take part.

Active involvement in a study group can also help bolster efforts along this line. By active involvement, I mean being responsive to the findings of others. One member may write and ask for verification that a mark on a stamp is a constant variety. You could well be the one who can provide this support.

A couple of paragraphs ago I stated that one doesn't have to be a genius. All it really takes is a commitment to really study your material.

For example, I have been plodding away at a book on the 1946 Commonwealth Victory issue for years. It wasn't until a couple of years ago that I lulled myself out of complacency and realized that all the flaws on these issues had not been discovered. In the few years since then, I have identified a bunch of varieties heretofore unlisted. These are constant varieties or semi-constant varieties of a fairly high degree of incidence.

A similar example exists with regard to Canadian precancels. It seems that there are a lot of precancels that have never been listed in the catalog. The precancel study group of BNAPS has now taken some steps to remedy this situation.

So, the next time you are irked because resources are not available, ask yourself if you have done your part. You probably do not have the references you want because you just have not looked and/or have not shared your findings.

Think about it ... better yet, do something about it!

UNUSUAL PRECANCELS

by Duncan MacDonald

A few unusual precancels ...

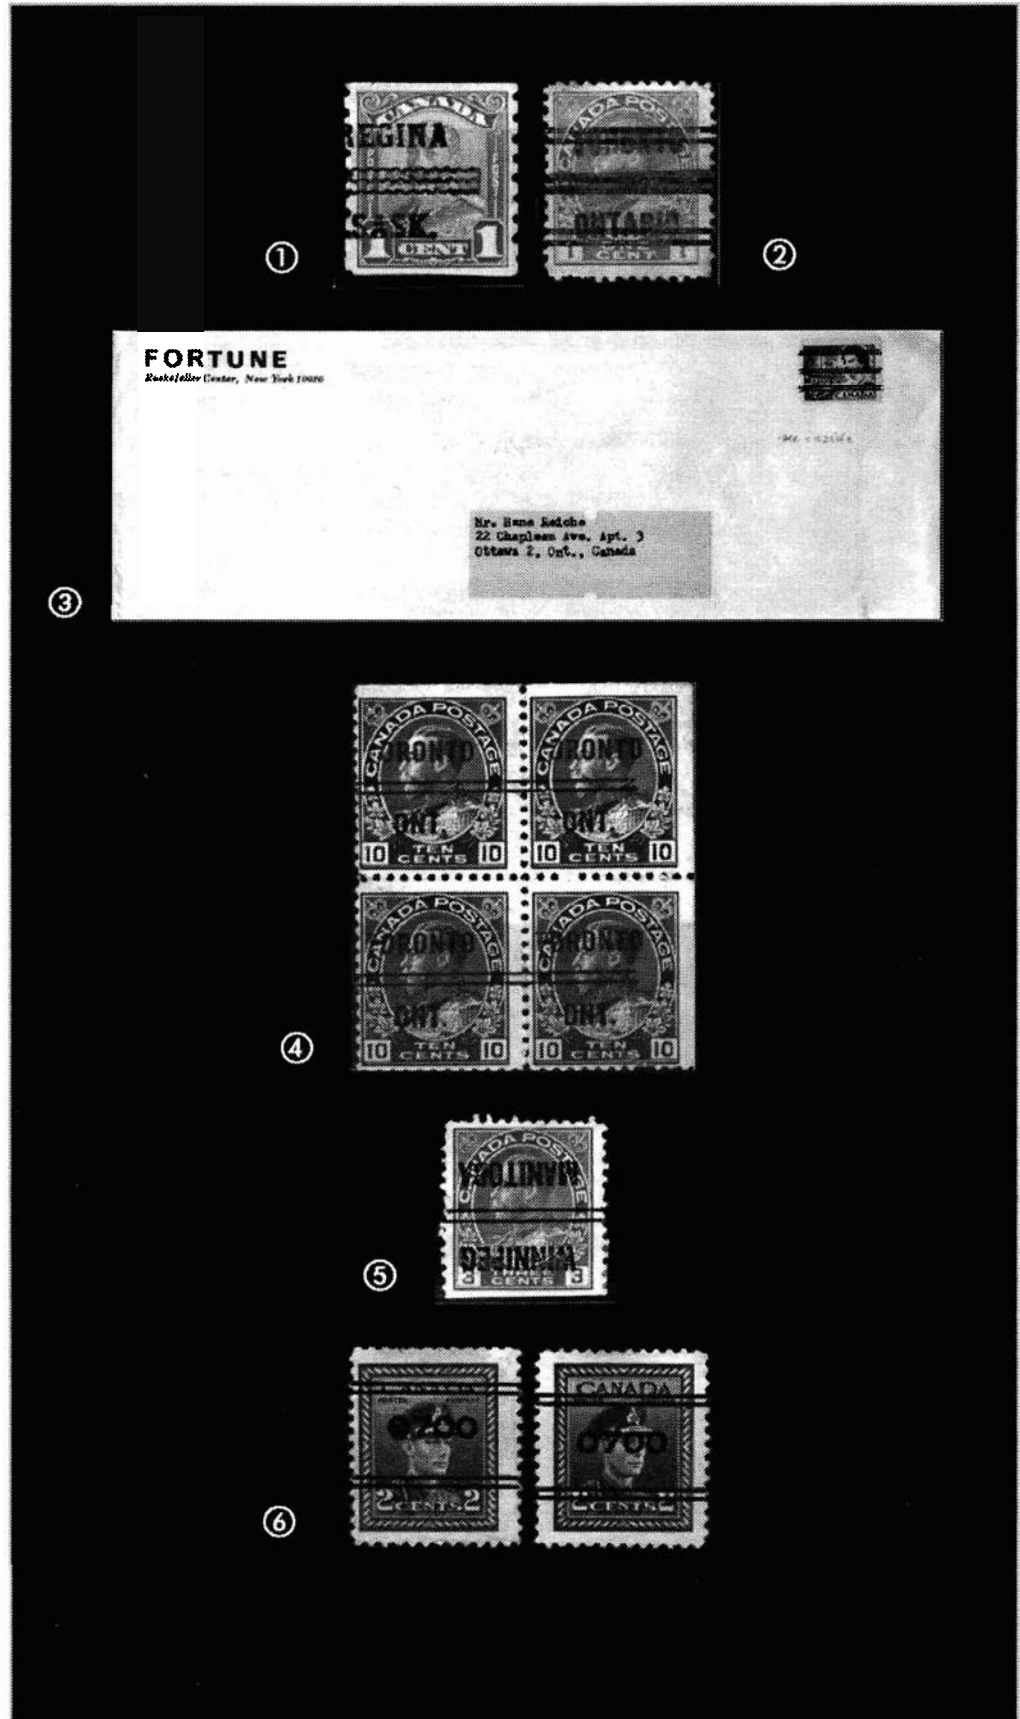

Regina 1-160. This is the only known coil with a town precancel (*Figure 1*).

Toronto 5-105-WV precancelled Toronto style 5 and V105 (*Figure 2*).

Fortune in New York bought stamps for mailing ads out and mailed these in Canada. A few sheets arrived in New York imperforate horizontally. These were cut apart for use and this is one such stamp. (Ex Reiche) (*Figure 3*)

The block of 117-precancelled Toronto (*Figure 4*) and the single precancelled Winnipeg (*Figure 5*) are examples of the squat printing, which measures 21.44mm instead of the normal 22mm. The only examples of squat printing on this stamp are all precancelled.

It is believed that only one plate was prepared for overprinting of Montreal style 10 precancels. The example of Montreal 10-252 (*Figure 6*) shows that the 0700 is positioned higher than normal. Therefore, there were either two plates or the original plate had one position that was entered incorrectly or was repaired and the number positioned incorrectly. I have checked several thousand duplicates but have not found any other stamps with this high positioning. I tend towards a repair of the plate; otherwise this positioning should occur with a relatively high frequency (1 in a 100). I would appreciate any information or ideas other collectors might have regarding this positioning.

BRANTFORD 3-105 SHEET REVISITED

by Bruce Fields

After reading the article by Andy Ellwood regarding his analysis of the Brantford 3-105 sheet (*Whole Number 1, Spring, 2000*), I looked over my own Brantford precancels. I found a cover bearing 3-149.

The stamp is from the left-hand column of the sheet and has the break in the lower bar, which identifies it as being from position 91 (number 11 of the 13 varieties identified by Andy). The most interesting thing to note is that proves that the type used to precancel this sheet was kept and used to precancel subsequent issues.

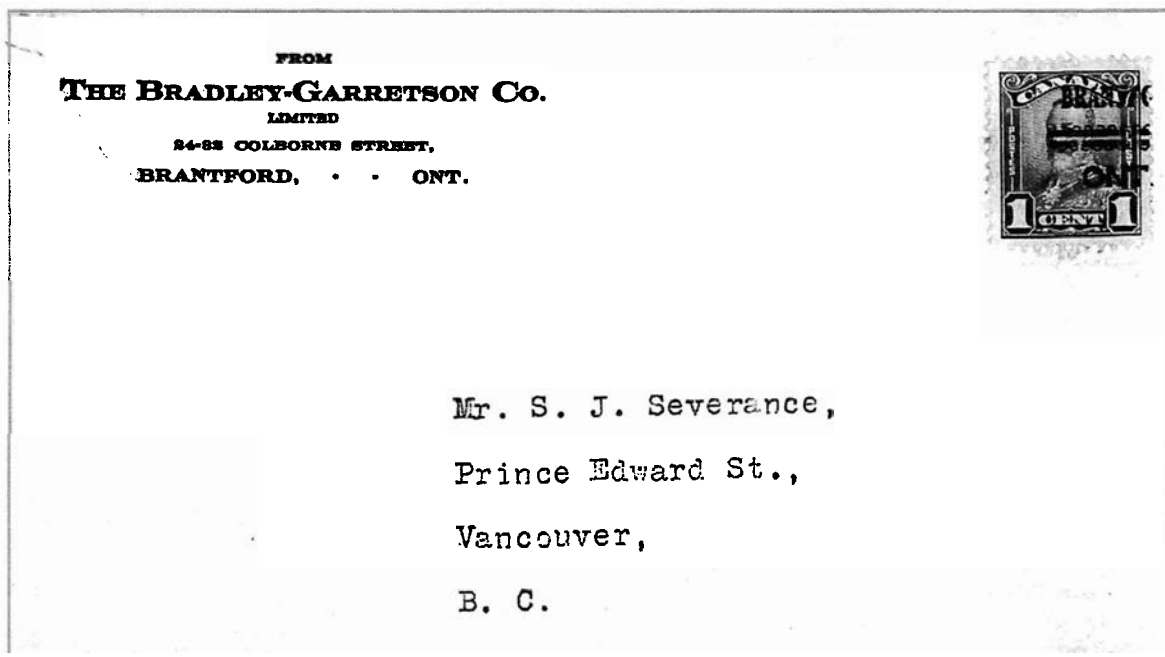

I also have a copy of 3-162 and 3-195 each with a nail head showing just to the right

of the 'D' in 'BRANTFORD'. These could be the number 6 variety (position 69). The nail head markings are not faint and could indicate that the nail had loosened a little in later printings.

It would be of interest if anyone has found any of the constant varieties, as identified by Andy, on the Medallion issue. Only the bar breaks and damaged letters could be used for identification as the nail

head varieties could appear with use of the plate or disappear if they were repaired.

If this plate is found to have been used to print the Medallion issue, it would be almost certain that only one plate was used to print the Brantford Type 3 precancels.

BAR TYPE IDENTIFICATION RESEARCH PROJECT REPORT

by Larry Goldberg

Unfortunately, I do not have much in the way of tangible results to share with you.

My thanks to all of you who took the time to fill out and send in your sheets showing the various bar types as you see them. I am using these in preparing a bar type guide based on the combined efforts of Hans Reiche and Andy Ellwood. For my excuses as to why these

projects have not shown much in the way of progress, see "A WORD FROM THE EDITOR". The same excuses apply ... which is another time saver.

Hopefully, this will all be back on track by the next issue, which should be in your mailboxes sometime in April.

My apologies. I have no excuses for my lack of performance, just good reasons.

NEW FIND ... I THINK.

by Rob Leigh

The discussion of unlisted precancels reminded me that I had picked up one at a show in Indianapolis over the summer (for 25 cents...). It's a bit shabby — looks like cut perfs at the bottom. It would be Winnipeg 4-109-I.

PRECANCEL PERFINS

by Norm Wagner

There is obviously abundant interest in these items. Recent auctions have yielded amounts well above catalogue value.

One of the last faxes I exchanged with Hans Reiche dealt with corrections of the precancel perfin listings in the current catalogue. We had identified five major errors which defied identification. Here are the changes suggested by Hans:

- Brockville P-1-107 should read P-1-104;
- Moose Jaw P-3-201 should be deleted;
- North Battleford P-1-131 cannot be identified at present; (Any comments?)
- Ottawa P-2-195 should be deleted;
- Ottawa 3-151 should be deleted;
- In addition, Toronto P-3-112 should be changed from W-9 to W-10; and
- Toronto P-10-112 should be changed from C-4 to C-14.

My own collection includes an Ottawa 1-199-I, perf M-8 (MD) not N-3 as listed. I would welcome comments since I assume 1-119 will also prove to be M-8 as are several Ottawa stamps of the same era.

I have also seen but do not own the following, with prices realized:

- Walkerville, ON
 - P-1-113-I P-6 (PD/Co) \$40.00
 - P-2-MR4-D P-6 (PD/Co) \$200.00
 - P-2-MR4-T P-6 (PD/Co) \$250.00

Your comments are most welcome. My email address is Normstamps@aol.com.

MEETING REPORT

STUDY GROUP MEETING: BNAPS ANNUAL MEETING

Acting Chair: Larry Goldberg

Attending: George Dresser, James Hansen, John Hilmer, Wayne Walton, J. Don Wilson, Ron Ribler, Doug Lingard

Schaumburg, IL
31 August 2000

Larry Goldberg welcomed the group. Regret expressed for absence of chairperson, Andy Ellwood, who was traveling in South Africa and web master, Duncan MacDonald, who is currently hospitalized. The group extended best wishes to Duncan and their hopes for his speedy recovery. There was no formal program. There was,

however, extended discussion of bar-type precancels with a general consensus that they are one of life's great mysteries. Many of those in attendance talked about their own efforts in researching these. It is obvious that a greater effort must be made to coordinate and publish individual findings.

Larry Goldberg talked about the current project of taking the various varieties as defined by Hans Reiche and Andy Ellwood and publishing this information. The problem of lack of agreement on the various types was reiterated. It was pointed out that even the

SCPC's descriptions do not agree with the Precancel Handbook.

It was suggested that anyone interested should send a group of scans or good photocopies of their bar cancels labeled as to type to see how they interpret the definitions of the various varieties.

Our thanks to all who attended. Hopefully, we'll have a better turnout in Ottawa in August, 2001.

Our thanks to Bob Lane, BNAPS Web Master, for furnishing us with photos of the meeting, one of which appears below.

TIME TO PAY YOUR 2001 DUES

US\$10 OR CDN\$15

Due to increases in costs of printing and postage, we've had to raise the dues slightly. Hopefully, we can sustain this rate for awhile.

Please send payment to the following:

If paying in Canadian funds, please send to:

Andy Ellwood, Box 83004, Ottawa, ON K1V 1A3.

If paying in US funds, please send to:

Dr. Wayne Walton 589 Thomas Jefferson Circle Madison, TN 37115.

DON'T PUT IT OFF. SEND YOUR DUES TODAY!

VARIATIONS IN SETTINGS - A REASON by Duncan MacDonald

The following two blocks provide one explanation of why the positioning of precancels is not consistent on all stamps. Even if the printer positioned the sheet correctly, variations in the overprinting plate caused differences.

Example 1 (top). This is the largest known multiple of Vancouver B.C. from plates 19/20 with different settings of the letters BC. (see handbook page 131 for more detailed explanation) It should also be noted that the setting for Vancouver while centered on the left hand stamp has shifted almost a 0.5 cm on the right hand stamp. The shift appears to be a constant increase across all stamps

Example 2 (right). This block of 24 from plate 3 upper right of Ottawa 3-120 also shows a shift of the words to the left from the first row to the last row.

Undoubtedly, some of you have examples like these in your own collections. How about sharing them with us?

TYPE J ROLLER OR PRECANCELLED STAMP? by Allan Magee

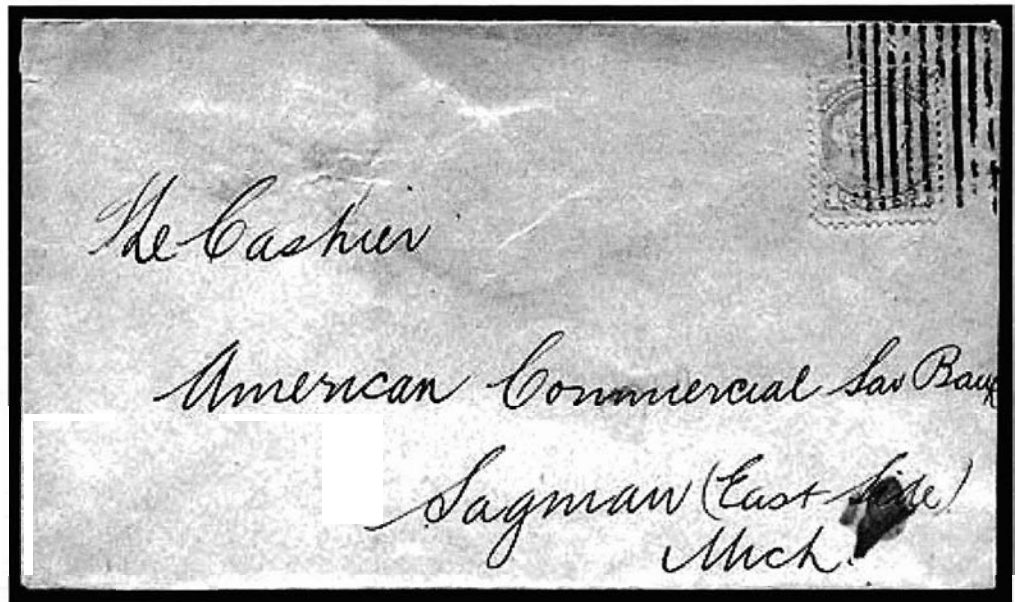

Both of the covers shown here were cancelled with a Type J roller cancel. It is obvious that if these stamps were removed from the covers, they would be classified as Type J precancels. Logically, this raises a very obvious question: when is a stamp cancelled with a Type J roller a precancelled stamp? I offer the following answers:

1. It **is** a precancel when the lines are vertical or horizontal, but **not** when they are slanted.

2. It **is not** a precancel when less than half the stamp has been cancelled.

If you would like to see some examples of what are precancels and what are not, let us know and we'll show them in a future input. In the interim, your input would be greatly appreciated.

Thanks to John Newman for his help in scanning the images and sending them to me. Ed.

IF YOU SEND US AN ARTICLE

Please, please, please put a byline on it. Someone sent in another article entitled "Canada Precancels with Perforated Initials." Somehow, the article was separated from the covering note and we have no idea who sent it. If it was you, please let us know. Write Larry Goldberg (see page 2 for addresses). Thanks.

WRITERS' GUIDELINES NOW AVAILABLE

At the annual meeting of BNAPS in Schaumburg, IL last August, I had the privilege of chairing a workshop for study group newsletter editors. One of the things I presented was a prototype of a set of guidelines for writers to use in preparing articles for

publication. Recently, I converted them for use by our study group. If you plan to submit an article, please request a copy. By following the simple steps outlined in the document, you can greatly reduce the time it takes to prepare this publication for printing.

Just let me know if you would like a copy. Write Larry Goldberg (see page 2 for addresses).

Thanks.

ATTN: RESEARCH PROJECT COORDINATORS

Please keep the editor informed of the progress you are making on your research projects. By keeping the membership informed, you are setting up a useful pipeline for further information. Thanks for your help.

WANT LISTS

You can have your own want list published here. See *A Word from Your Editor* on page 2.

PRECANCELS ON THE 3c SMALL QUEEN ISSUE.
Ron Ribler, chairman of the LQ/SQ Study Group, is interested in buying precancels on the 3 cent SQ issue. He has the A, I, J, R, S, and T and is looking for the others. Send pics and prices to him at laudron@yahoo.com or PO Box 22911, Ft. Lauderdale, FL 33335.

PRECANCEL LATHEWORK & ANY MAJOR PRECANCELLED RE-ENTRIES .
I am also interested in trading or purchasing for the more expensive \$100+ town type precancels I need. I can be reached by e-mail at duncan@camacdonald.com or at Duncan MacDonald, P.O. Box 37013, Lynnwood Postal Outlet, Edmonton, Alberta T5R 5Y2, CANADA

TOWN PRECANCELS ON KGVI REVISED & UNREVISED ISSUES.
Larry Goldberg is looking for town precancels (other than the more common ones) on the KGVI revised and unrevised issues. What have you got for sale? Email editor@kg6.com or by snail mail at Box 7170, Buffalo Grove, IL 60089-7170

TORONTO PRECANCELS ON COVER. Larry Goldberg is seeking covers bearing precancels with Toronto town cancels. What have you got for sale? Email editor@kg6.com or by snail mail at Box 7170, Buffalo Grove, IL 60089-7170

IMPORTANT!
WANT ADS ARE FREE TO STUDY GROUP MEMBERS, BUT WE CAN'T RUN YOURS IF YOU DON'T TELL US WHAT YOU WANT.

WANTED

I would like to purchase any of the stamps listed below and will pay 1.5 to 2 times catalogue depending on condition. I will also pay \$1,000 for any of the Sydney stamps and \$2,500 for Amherst 1-107. I have some duplicates of the more expensive stamps so would consider a trade for what I need. I will also pay catalogue (+ for VF) for any of the \$150+ stamps not on the list below. Contact: **Duncan MacDonald, BOX 37013, Lynnwood Postal Outlet, Edmonton, AB T5R 2Y9 CANADA OR via Email to: duncan@camacdonald.com**
