PREFACE

The present list of Earliest Reported Postmarks (ERPs) was begun using dates provided by Bill Walton, who has coordinated the project. The first ERPs were listed on page 1 of the first issue of Postal Stationery Notes, and hundreds of dates had been moved back by the time a preliminary list was distributed to Study Group members two years later. Through the 1980s, a large percentage of the members of the study group contributed new dates.

Since the preliminary list was published in 1983, dates have been added for other stationery, including the special order envelopes, railway view cards and official stationery. Earlier dates for many other items have also been reported. It is anticipated the results of this project will soon be published as a handbook. Before that, however, it seems useful that all study group members have another chance to compare their dated material with the ERPs on the current list.

It is hoped all members who have not recently checked their collections will do so. In some eras, more than 50% of the original target dates published more than ten years ago have not been changed! That said, more than ten earlier dates (on stationery ranging from the Victorian period to the Elizabethan) were recently found in the stock of a single dealer. Significant early dates have been found even in very small collections.

If you have an ERP, please send a clear photocopy of the front and the back of the item either directly to Bill Walton (125 Turtleback Rd., Califon, NJ 07830, U.S.A.), or c/o the editor of Postal Stationery Notes (Robert Lemire, Box 2124 Deep River, ON, K0J 1P0, Canada). Please try to obtain photocopies that show the postmark clearly, and are adequate to avoid ambiguities as to the identity of the item (knife, die type etc.). To minimize confusion, ERPs for post cards on "soft thick stock" and for other paper varieties will usually not be changed unless the item is examined by Bill Walton.

The list is printed in Webb Catalogue order. One section, the dates for the flimsy stock freight advice cards, remains to be addressed. A preliminary list will appear in PSN later this year. Earliest dates for these items (RKP series in Webb's) are requested.

There may be some cases where reports of earlier dates have been submitted by members, but these dates do not appear in the list. There are several possible reasons for this. The photocopy may not have been adequate to allow absolute identification of the item. This has been a particular problem for items differing only slightly in colour, and for some paper and die varieties. The postmark on the photocopy may not have been clear enough to allow it to be recorded, or the postmark might have been open to interpretation as a later date. The photocopy may have been mislaid - over a period of more than ten years, it is very likely this has occurred in at least a few instances. Finally, an even earlier date may have been ascribed to the item in error. When an error is discovered, the ERP on the list reverts to the earliest date currently available to the compiler. Before the error

is discovered, photocopies bearing postmark dates later than the error date may well be discarded. If your ERP is not listed, and you received no explanation, please try again.

We thank Jean Walton for typing the list and incorporating the seemingly endless revisions.

REGULAR ISSUE ENVELOPES

QUEEN VICTORIA

1860 The Mesbitt Issue

EN1	5¢ red, 1860 flap	Feb 14, 1860
a	5¢ red, 1865 flap	Sep 15, 1865

f	3¢ red #8, bottom line 36 dots	Oct 9, 1924
d	3¢ red #10	Jun 24, 1925

* Privately prepared postmarked examples with typewritten "first day" notations exist for these items, prepared by several individuals either in or with apparent connections to the Post Office in Ottawa. These dates are not always in agreement with one another, and we have seen instances where ERP's actually predate "first day" examples. We are unsure of the status, accuracy, or reliability of these "first days," but we show for the record the earliest of those known to us where they predate recorded ERPs.

-------	--------------	-------------

Note: From this point (the Arch Issue) through the King George VI Issues, two printers produced private order envelopes. Dominion Envelope produced Pennysaver, side-seam, and tab envelopes, always in rotary press printings. The Department of Public Printing and Stationery produced cross-flap and center-seam envelopes, and added stamps to prefolded envelopes (either the only stamp as in the Gage Self Seal, or a second stamp to produce a compound die), but always flat plate. ERP's are shown for both types of plates.
