Newsletter of the BNAPS Machine Slogan Cancel Study Group

VOL. 1 - NO. 2

APRIL 1988

A Joint Message from the Chairman and the Editor

Since publication of our first issue, we are pleased to report the names of several new members, considerably increasing our ranks and indicating a wider interest in slogan collecting than may have been thought.

New member Lewis Ludlow, much involved in a very active Pacific Northwest BNAPS regional group, has requested sample copies of the Newsletter and application forms, for circulation at their next meeting. Meanwhile, your Chairman has been doing the same at the last meeting of the Prairie Beavers Regional Group, so we are getting good coverage. Any member wishing additional sample copies of the Newsletters and applications should not hesitate to contact the Chairman for these.

There has been recent correspondence with member Kim Dodwell, regarding his specialized interest in the W.W. II blackout cancels, particularly the dates of both slogan and wavy bar usage. Anyone sharing this interest, or having any of Kim's requested data, should contact him.

New member Douglas Lingard, until recently interim editor of the Flag Cancel Study Group Newsletter, The Flagpole, has kindly provided copies of very interesting usage reports from the early 1920's, which have now provided additional information regarding our recently classified BWS slogan 895. See the "update" pages. As 20th century Flag cancels are all really "ornamental" slogans, members may wish to contact Doug in regard to membership in the Flag Group. If you do so, he will provide you with four back issues of the Newsletter, which much update the Flag Handbook and are beautifully presented and valuable references.

Member Earle Covert has sent his remarkable computer listing of two large boxes of Edmonton slogans, giving dates of use for each strike and arranged in both alphabetic and chronologic order. By listing all dates, rather than just annual earliest and latest, it clearly indicates both periods of exclusive and of concurrent slogan usage. Although it is still far from being complete, it is an amazing piece of work as it stands. With some help from the membership, this could become a classic reference of Edmonton slogan usage.

While the above may sound as though we are getting a lot of feed-back from the membership, it is actually a rather disappointing number of responses to our first issue. Far more members not heard from than those who were. It is not that we want pats on the back for a job well done. Rather we need member contributions of articles or questions, indications of member wishes as to contents of further issues and the interchange of information between members that is the major purpose of a Study Group.

So far, the two issues have necessarily represented only our own special areas of interest. If these do not excite the members enough to warrant comment, then at least we deserve some guidance as to what would be more exciting. There are Study Groups who go so far as to cancel further Newsletter sendings to a member who fails to respond to the last one. We hold no brief for these draconian measures, but are not adverse to suggesting that, without more aggressive membership participation, this Group will not meet its goals.

Let's hear it for The Slogan Box.

XM: Member willing to exchange material
XI: Member willing to exchange information

Since putting this issue "to bed" we have received a good amount of information from members Ron Leith, Doug Lingard and William Bartlett on the BWS and V...- slogans. This will be included in the next issue of THE SLOGAN BOX. Members who have material but have not yet contributed are urged to do so in the next two weeks.

Updates to prior classifications

Slogan Box 1 included classifications of slogan 895, BUY WAR SAVINGS STAMPS and slogan 9965, V...-. Some additions and updates of these two are now noted, and members should correct the listings as follows:

Slogan 895

Proulx slogan 27, in French only, translating as the English slogan 895, was omitted from the original listing. Reported by Sessions as being an International, used only at TROIS RIVIERES in 1920, without dates, but 1919 use reported by Proulx, without other confirmation. Since 1920 use without prior 1919 use is most unlikely, use was probably in both years.

EDMONTON - Earle Covert reports earliest I use, MAR 4.19, was APR 11.19 and latest U use APR 11.20, was SEP 24.19.

MONTREAL - U use, die 2, latest DEC 31.19, was SEP 18.19.

REGINA - I use, earliest MAR 3.19, was APR 1.19

ST. JOHN - I use, indicea variety, APR 10.19, hub inverted with time mark normal. U use, indicea variety, DEC 25.19, hub inverted with time mark normal.

Additionally, Douglas Lingard has forwarded copies of an article by A. H. Pike, CHECK LIST Postmarks with Slogan Cancellations (British North America), published in the October, 1922 COLLECTORS' DIGEST, an article also referenced by Sessions. Comparison of this article with known data suggests that it is not entirely reliable, and the following information presented from it is somewhat questionable.

CHARLOTTETOWN - 1919 U use reported

INGERSOLL - 1919 Columbia use, rather than Universal

KINGSTON - 1919 U use, two dies reported. Unconfirmed and unlikely.

MONCTON - 1919 U use reported.

MONTREAL - I use, 4 dies reported. Three have been identified and a 4th is quite probable, as with U use.

- 1920 U use reported for all 4 dies, so far recorded for only 2

MONTREAL STA. C - Columbia use reported, but this style of dater is not known. The reference may just possibly be to the Montreal U die with indicea C added, but if so it could not be Columbia use.

MOOSE JAW - 1919-20 U use, two dies reported. Unconfirmed and unlikely.

NELSON - 1919-20 Columbia use, rather than Universal

OTTAWA - 1919 I use 2 dies reported. Unconfirmed but possible.

OWEN SOUND - 1919 U use 2 dies reported. Unconfirmed and unlikely.

Updates to prior classifications, Slogan 895 continued.

ST. HYACINTHE - 1919 Columbia use reported

SASKATOON - 1919-20 U use, 2 dies reported. Unconfirmed and unlikely.

TORONTO - 1919-20 U use, 5 dies reported. Only 3 presently recorded, but additional dies very probable.

VANCOUVER - 1919 I use, 2 die reported. Confirmed by Jeffrey Switt as follows; Die 1, I of SAVINGS over H of HELP, recorded APR 23.19 only.
Die 2, I over E of HELP, recorded on an undated strike only.

WELLAND - 1919 Columbia use, rather than Universal.

WINNIPEG - 1919 I use, 3 dies reported. Only 2 presently recorded, but a third very probable.
1919-20 U use, 5 dies reported. Only 4 presently recorded, but a fifth very probable.

Slogan 9965

EDMONTON - Earle Covert reports earliest AUG 25.41, was SEP 16.41, and latest APR 14.42, was DEC 19.41.

FREDERICTON - Now recorded MAY 23.42 to MAY 27.42

HAMILTON - Jeffrey Switt has established previously unrecognized differences in actual usage, as follows:

Die 1, Receipt strike sent AU 8.41, V is 16mm tall, thinner than die 2. Distance from left vertical box line to right of third dot is 34+ mm, recorded AUG 12.41 to OCT 18.41.

Die 2, Receipt strike dated DE 14.41, V is 17mm tall, thicker than die 2. Distance from left vertical box line to right of third dot is 33 mm, recorded JAN 9.42 to FEB 16.43.

There does not appear to be concurrent use of the two dies, so the second probably replaced a damaged first in DEC.41.

VICTORY LOAN-1919
THE BRIDGE FROM
WAR TO PEACE

Proulx lists usage of this slogan as being BRANDON only, 1919, but this is most certainly one of his major omissions, since there is substantial documentation of 1919 usage from a total of 22 offices. The slogan is one of a considerable group of related 1919 English or French--but not bilingual--slogans urging purchase of Victory Bonds in support of the Victory Loan campaign.

The confirmed classification of using offices is as follows, with NELSON, ST. HYACINTHE and WELLAND reported as Columbia machine use, the balance all being Universal machine use. There are no reports of International use.

AMHERST	BELLEVILLE	BRANDON	BROCKVILLE	CALGARY
CHARLOTTETOWN	GALT	HALIFAX	MOOSE JAW	NELSON
PETERBOROUGH	PORT ARTHUR	PRINCE RUPERT	ST. HYACINTHE	SASKATOON
SHERBROOK	STRATFORD	TORONTO	WALKERVILLE	WELLAND
WINNIPEG	WOODSTOCK			

SLOGAN 1150, THE CANADIAN NATIONAL EXHIBITION

FINDINGS PERTAINING TO THE 1912 DIE USAGE

by Jeffrey Switt

There are many discoveries awaiting the inquisitive slogan collector in slogans which, for the most part, can be overlooked due to their "common" nature. An example is the 1912 usage of the C.N.E. slogan of Toronto.

For many years, I had resisted trying to do anything with the Toronto International slogans in general, due to the great number of slogans available and because of the massive amount of material needed in order to "sort things out".

I recently began examining my 1912 C.N.E. strikes, with Sessions' Early Rapid Cancelling Machines as a guide. I was intrigued by his comments that, while there were only four machines in use at Toronto in 1912, there were clearly five C.N.E. dies used in that year, one blank and the others numbered 1 to 4. Why would the office have an "extra" die of the slogan, one more than the number of machines available?

The most obvious answer was that the "extra" was a back-up, if one die were to become unservicable, but Toronto already had several standard wavy line obliterated available for use in the fourth machine if a back-up were needed.

A comparison of my available dates of use, by die, revealed that my three examples of the blank die, dated between April 25 and May 3, were earlier than my recorded use of any of the numbered dies. At the same time, a comparison of the lettering characteristics of the various dies indicated clear differences between the numbered dies, but not between the blank die and the die numbered 4.

To confirm this similarity, I obtained high quality transparent acetate photocopies of both dies, and superimposing these on actual strikes of the blank die and die 4 proved that they were identical. It can therefore be established that die 4 was a subsequent conversion of the blank die, by the addition of the numeral. This must have taken place after latest blank use of May 3 and prior to my earliest die 4 use of Aug. 2, a considerable gap which it is hoped that members can narrow.

There is much earlier precedent for such conversions. See Flag Handbook, page 19, referencing Montreal type 8 of 1900, where several blank dies were later converted by the addition of letter indices.

Since the fifth Toronto machine was not introduced until early 1915, the reported 1913 and 1914 usages of this slogan, each with one blank and four identified dies, may involve the same situation. Unfortunately, I have no examples of a blank die in these two years to compare with identified ones. If any member has examples of the blank 1913-14 dies, photos and dates would be much appreciated.

The Modified "Blank" Die

Sessions* notes that 4 machines were in use in Toronto in 1912, but that 5 CNE slogan dies were used. An examination of dies has revealed that the "blank" die was modified with the inclusion of the numeral "4".

This is proven by the acetate copy of the blank die superimposed over a copy of die 4 with no differences.

An original discovery.

SLOGAN 2262 and 2262A (FLAGS),
CORONATION H.M. KING GEORGE VI MAY 12, 1937 AND H.M. QUEEN ELIZABETH

A recent auction purchase of a rather large collection of these slogans indicates an interesting variety of covers available during their short six day usage.

The slogans have been most comprehensively classified by the Flag Study Group, (their types 50 and 51) in terms of office usage, by date and dater, or die varieties. However, it does not extend to the various very attractive cachets often seen on the first day May 10 covers, nor to the illustrated commercial covers that can be found on all dates of the May 10-15 period, even May 12, which as Coronation Day was a National Holiday.

As the Flag Study points out, the first day of use of the slogan, on MAY 10, 37, was also First Day of Issue of the 3 cent Coronation stamp, so that much usage features that stamp. Additionally, the 10th was also First Day of Issue of the 4, 5 and 8 cent values of a new 1937 George VI Regular Issue. Additional usage can be found with lower values of the 1937 stamps, issued a few weeks earlier on April 1, 1937, as well as remnant use of the prior 1935 George V issue.

It should be noted that P.O. documentation totally supports the list of 20 English and two bilingual using offices reported by the Flag Group, and indicates that the Proulx listing of 18 English offices is in error, as it incorrectly includes MONCTON and ST. JOHN'S NFD, but omits FORT WILLIAM, NEW WESTMINSTER, NORTH BATTLEFORD and PORT ARTHUR.

COLLECTING ILLUSTRATED SLOGAN COVERS, by Jeffrey Switt

The author believes that one of the most "Collectable" areas of slogan cancels is that of covers that have both local event slogans and also corresponding cachets. Such covers can be found throughout the history of slogan cancels, and the earlier ones through the 1930's are very desirable. This is confirmed not only by the prices that dealers ask for them, but also by collectors' willingness to pay for them. Those who collect them for the slogan aspect will find keen competition from Fair and Exhibition collectors, who have little or no interest in the slogans themselves. Illustrating this article, on the following pages, are a few examples from the author's collection. Clear photos of similar covers would be appreciated for personal reference purposes and inclusion in future issues of The Slogan Box.
