Dear Fellow Member,

Once again, BNAPEX is just around the corner. I would like to thank Dan Rosenblat for his continued dedication to the Slogan Study Group. I look forward to the release of our newest handbook at our convention. Hope to see you there.

Until the next issue, I hope all is well.

Your Chairman,

Dan Huffman

EDITOR'S MESSAGE

This Issue 31 has both slightly less pages than is normal and is appearing slightly later than scheduled. Both factors are the fault of the Editor, since he has just completed the rather feverish task of final preparation of our Group's fifth consecutive yearly publication of a Slogan Handbook at the Annual Convention of BNAPS, to be held at Toronto quite shortly after this is being written.

This Handbook is actually a compilation of the four prior Handbooks, combining their four separate periods, 1912-19, 1920-30, 1931-40 and 1941-53, into a single voume of the 1912-53 period. It includes all updates, corrections and additions that have been noted in the past four years, and is therefore a very difinitive reference work of a major portion of Canadian slogan usage.

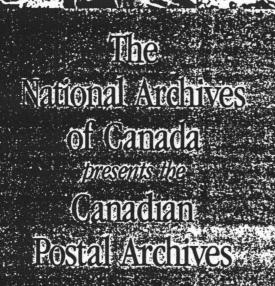

Getting this Handbook ready for the printer, in time to ensure its delivery to the Convention site reasonably prior to the event, was an absolute priority over all other philatelic efforts. The work had been prepared and was in the computer some time ago, but the final print-out had been delayed in case of last minute corrections or additions.

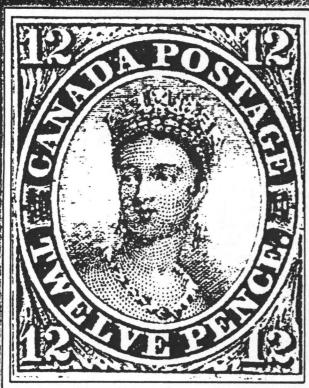

Unfortunately, just before print-out time some two weeks ago, the Editor's rather ancient early version of Lotus 1-2-3, in which the work was entered, suffered a collapse. Nothing was lost, since it was all on the hard disk, but it could not be retrieved or printed. This entailed buying a new, more up-graded, version of Lotus, but when it was installed it was found—as is so often the case when old data is mixed with new software—that problems existed.

The work had been prepared for standard printer condensed format at 16 1/2 characters per inch. To the Editor's amazement, the new Lotus had a different condensed printing standard of 21 characters per inch, that overrode his printer's standard. The result was a very excessive right margin, since what had taken 7 1/4" per line in the old standard was now further condensed to just a little over 5" per line. This required re-editing of the more than one hundred pages of the book at nearly an hour a page, resulting in the feverish task mentioned above.

However, all is now accomplished, the book at the printer's in good time for completion and delivery to Toronto and the slightly shorter than normal newsletter ready to go to the Chairman only a few days later than had been scheduled.

One factor that assisted in completing the Newsletter promptly was the inclusion of photo copies of a new brochure just received from the Canadian Postal Archives. This very interesting and informative presentation of the background and contents of the Archives is in a seven leaf fold-out, English on one side and French on the other, and seems very worth reproducing for the benefit of the membership, who might not have a chance to see it unless in correspondence with Ottawa.

National vyrchives - Aychives nationales of control of

The Canadian Postal Archives (CPA) was created on April 1, 1988, by the National Archives of Canada to acquire and preserve our philatelic heritage for all Canadians. The CPA makes its collections, such as the national stamp collection, available for research and consultation by the general public in conjunction with a philatelic reference library.

The major collections were formerly held by Canada Post Corporation in what was called the National Postal Museum. The National Archives of Canada was pleased to accept their transfer because of its legislated mandate to preserve for posterity the valuable historical records of the Canadian government.

The collections include many kinds of records: the philatelic items, related original artwork, photographs, postal maps, broadsides, circulars, posters, private manuscripts and library material.

The Philatelic Collections

The Canadian Postal Archives takes pride in a number of rarities among the vast holdings of its philatelic collections: examples are a mint marginal corner pair of the twelve-pence black issued by the Province of Canada in 1851, and a single-plate proof, on vertical laid paper, of the 1860 Dominion of Newfoundland one-shilling orange postage stamp. The most sought-after example in our holdings of a Canadian stamp with a design error is the 1959 commemorative issue of the St. Lawrence Seaway five-cent stamp with the inverted centre.

However, the distinguishing feature of the bulk of the philatelic collection is the many essays, proofs, die proofs, press proof sheets and other items that mark the various stages of stamp production. These offer the philatelic specialist the opportunity to research the development of a particular stamp issue from start to finish.

Another unique research resource is the CPA's collection of proof books containing over five thousand pages of post office cancellation proofs from 1839 to the present.

Items representative of the different administrative periods of postal history include covers and postal markings carried by ocean, railway, air and military mails.

Cover

Left side of an unused corner margin pair of the twelve-pence postage stamp issued by the Province of Canada on June 14, 1851. (Pos-31) Augmenting the Canada Post Corporation materials are the specialized private and corporate collections. Outstanding examples are the H.E. Guertin and R.F. Webb collections of military mails; the R. Del French collection of postal stationery; the F.G. Stulberg collection of steamboat mails; the Col. Robert H. Pratt collections of proofs and essays of Newfoundland; as well as an extensive selection of pre-production postage stamp and revenue materials, for Canada and British North America, from the Archives of the American Bank Note Company.

Lastly, the CPA is the custodian of postage stamps from all over the world, acquired through the Canada Post exchange program with member countries of the Universal Postal Union. This collection dates back to 1878 when Canada joined the UPU, and is a true international collection.

The Artwork Collections

During the 1950s, the Post Office Department, recognizing the importance of the artistic conception, began to solicit designs from the art communities across the country. The creation of the Postage Stamp Design Advisory Committee in April 1969 formalized the process, so that now most of the designs submitted to the stamp program are created by artists and designers in the private sector. Thus, the CPA receives not only the artwork relating to the final accepted design for each stamp issue, but all of the unsuccessful designs submitted to the Committee by other artists. As a result, the artwork collections include works unknown to the public, in addition to those that have been reproduced on stamps.

Among the more important artists represented in the CPA's artwork collections are Emmanuel Hahn, Harold Beament, Laurence Hyde, A.J. Casson, Gerald Trottier, Glen Loates, Robert Bateman, Henri Masson, Jean-Paul Lemieux and Antoine Dumas. The CPA's collection of artwork produced for stamps prior to 1950 is incomplete. Most of these designs either were based on existing works of art (such as EM. Bellsmith's painting depicted on the 1928 ten-cent "Mount Hurd" stamp) or were produced by artists employed by the banknote companies. Today, the CPA strives to add to the pre-1950 artwork collection by acquiring items on the open market or from private sources whenever the opportunity arises.

Canad'ä

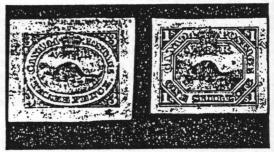

The Photograph Collections

Approximately 40,000 prints and negatives, and a corresponding collection of 35mm slides cover most subjects pertaining to Canadian postal operations, postal history and philately. Of particular interest are photographs of post office buildings, the transportation and delivery of the mails, and stamp production, designers, artists, uniforms and the like. These collections are an important resource of visual information for the postal historian. They complement the extensive general photographic collections retained by the National Archives of Canada.

Maps

The CPA has a small collection of maps comprising originals and copies of maps showing the location of various post offices and postal routes. As in the case of the photograph collection, the CPA's map collection complements a much larger collection of maps held by the National Archives of Canada.

Broadsides, Circulars and Posters
The Postal Archives holds a unique collection of nineteenth-century postal notices. These circulars were sent originally by the postmaster general to the various postmasters in Canada as Departmental orders. They are particularly important for the postal historian, as they precede the *Post Office Official Guide*, which began publication on a regular basis in October 1875.

Lithographed essay-proofs proposed for Canada's first issue of postage stamps. Designed in February 1851 by Sir Sandford Fleming, this artwork was ultimately used for the three-pence stamp issued by the Province of Canada on April 23, 1851. (Pos-39)

Manuscripts and Papers

In order to document the widespread hobby and study of philately in Canada, the Postal Archives has initiated the acquisition of private papers generated by collectors and individuals associated with philatelic activities over the years. The collection includes correspondence exchanged with other philatelists and dealers, research notes, photographs, clippings and articles on postage stamps and postal history.

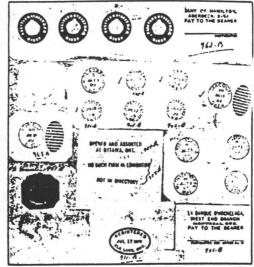

Among the more important collections held by the CPA are: the George C. Marler papers; the Douglas and Mary Patrick papers (reflecting their involvement with the CBC Stamp Club of the Air); the Richard K. Malott papers on the development of Canadian air mail services; and the 1951 minute book of the Capex international philatelic exhibition.

The Canadian Postal Archives' collections of papers complement the vast and rich holdings in other areas of the National Archives. The Archives holds the Post Office Department record group (RG 3), which represents thousands of linear feet of files generated by the Post Office Department; and retains the British Post Office manuscript group for Canada and British North America (MG 44), consisting of several hundred microfilm reels of records generated by the General Post Office in London, England, from approximately 1690 until 1867 and later.

The Library Collections

The Library retains approximately 20,000 publications on all aspects of Canadian and international philately, including about 1,000 Canadian handbooks and catalogues published since the beginnings of Canadian philately. Also among the Canadian items are historical publications issued by the Post Office Department, such as *Annual Reports* of the Postmaster General, official postal guides, special reports, etc. An extensive collection of books from the Universal Postal Union includes special reports, conventions for postal rates, regulations on exchange of mail between countries, and so forth.

Examples from the more than 2,000 periodicals are: complete runs of the Canadian Philatelist, BNA Topics, Maple Leaves, Canadian Stamp News, Linn's Stamp News and such items as The Stamp Collector's Record, published in Montreal in 1864. Altogether, the Library receives approximately 150 different magazines on a regular basis.

A page from the March 1908-April 1912 Hammer Proof Impression Bunk. (Pos-35)

Auction catalogues are also collected in order to maintain a record of sales of important philatelic material both in Canada and abroad. Sets of catalogues for J.N. Sissons Inc., L.C.D. Stamp Co. Inc., R. Maresch & Son, J.A. Hennok Ltd. and John H. Talman Ltd. represent some of the many Canadian auction materials. The international auction houses are represented by firms such as Harmers, Robson Lowe, Sotheby's and Robert Siegel. Certain famous auctions have been specifically identified, such as the Ferrari, Hind, and Dale-Lichtenstein sales.

The Library also maintains a fairly complete collection of stamp catalogues from both Canadian and international exhibitions. One catalogue dates back to a 1923 event in Yorkton, Saskatchewan, and appears to be the oldest such printed brochure that exists for Canada.

In 1975, the Library began to photocopy and bind major stamp and cover collections formed by prominent philatelists. The collections of Messrs. Wellburn, Stulberg, Malott, Pratt, Bayley, Arnell, Smith, Des Rivières and others are now available for research in this form. Together with auction catalogues and some dealers' price lists, they permit researchers to identify the provenance of the items they hold. They also provide an important visual record of the holdings and specialized research that was compiled by a particular collector over the years.

Consultation of Originals

Original records are made accessible to the public through collections' consultation. Professional staff will provide access to these holdings by assisting researchers in determining their exact requirements, identifying appropriate finding aids, facilitating retrieval of original records from archival storage, and providing a collections consultation area where original records and finding aids may be consulted. Researchers who wish to consult original material are advised to contact the CPA well in advance of their intended arrival date, so as to ensure adequate time for the reference consultant to retrieve and prepare the desired records for study.

Information

Researchers are welcome to visit the CPA in person during regular hours of operation, or they can obtain research assistance by writing or phoning. Various reference tools and finding aids to the holdings are available, in addition to the Library collections, which may be retrieved through the UTLAS database. Researchers who are unable to visit the CPA in person, may obtain access to most of the publications through inter-institutional loan. The staff of the CPA will try to answer your questions or will guide you to sources most likely to provide you with the information you require.

For more information, please contact: National Archives of Canada Canadian Postal Archives 344 Wellington Street Ottawa, Ontario K1A 0N3 Phone: (613) 995-8085 Fax: (613) 992-3744

Hours of Operation: Monday to Friday, 8:30 a.m.-4:45 p.m.

Researchers using the Canadian Postal Archives facilities have the opportunity to study an extensive range of original material first-hand. (NA/20789/B13)

Pre Mid-1919 Universal : LOGAN USI

When major slogan use was first introduced in Canada in 1912, all known cancelling machines were of the International type that replaced the earlier Bickerdikes from 1902. Therefore, all slogan use in 1912, and the great majority of slogan use from 1913 until most Internationals were replaced by Universals in mid-1919, was from dies acceptable to International machines.

However, beginning in 1913, a few Universal machines replaced or were added to International usage in at least twelve offices, presumably on an experimental basis. These included additional machines in MONTREAL, QUEBEC and OTTAWA and replacement machines in BELLEVILLE, BRANTFORD, KINGSTON, MOOSE JAW, NIAGARA FALLS, OWEN SOUND, PETERBOROUGH, PORT ARTHUR and SASKATOON.

It can be noted that the replacements were in smaller one-machine offices and it would be interesting to have documentation as to why this experiment was undertaken and on what basis the selected offices were chosen. Unfortunately, the Archives have no retained correspondence for this period, so the answers to these questions can only be conjectured.

Since Universal machines were generally introduced to replace Internationals in mid-1919, it can be assumed that the experimental early Universal usage was successful, and suggests that dissatisfaction with the Internationals was evident well before their later almost total replacement shortly after the end of WW I.

The dates of these Universal additions or replacements has been indicated by David Sessions in his definitive work on International machine usage, "The Early Rapid Cancelling Machines of Canada".

In any event, this limited Universal use between 1913 and mid-1919 impacted slogan usage, since the Universals could not accept the International dies that produced the large majority of early slogans, so special dies were required for Universal slogan use in this period. As not all of the twelve offices involved had slogan use prior to mid-1919, the number of these special Universal dies is quite limited, and therefore constitute an interesting specialized collecting field.

Accordingly, the known usage is listed an when possible illustrated. Since receipt strikes were not introduced until after this period, illustrations must be of actual strikes as available, rather than clearer documentation. The separation of the Universals from the Internationals on actual strikes is not difficult, since the daters that were used with the two types were distinctively different. The International dies were used with a dater having the year at the bottom, while the Universals were used with a dater having the year in the indicia and a provincial abbreviation or CANADA at the bottom.

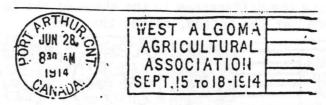

Usage is recorded from eight of the twelve offices, totaling twenty-eigh uses of eleven different slogans, as follows alphabetically.

BELLEVILLE - Sessions states that the U machine replaced an I somewhat later than most, not being issued until February of 1917. The office used an I die slogan 205, Annual Citizens' Celebration, in 1914, but had no slogan use of the WW I flags or of 895, Buy War Savings Stamps, and only resumed slogan use in late 1919 with of one of the Victory Loan group.

BRANTFORD - A U machine replaced an I in September of 1913. There had been no I slogan use, but a U slogan 693, BRANTFORD OLD HOME WEEK, was issued in 1914, a U die of flag slogan 4570 was used in 1917 and a U die of slogan 895 in early 1919, so there was use of three Universal slogan dies in the early period. All three can be illustrated on the following page.

PETERBOROUGH - A U machine replaced an I in November of 1912. There had been no I slogan use and the office did not participate in the 1917-18 flag slogan use nor in the use of 895. Its first slogan was not issued until a proprietary advertising the PETERBORO EXHIBITION in 1923.

PORT ARTHUR - A U machine replaced an I in December of 1913. There had been no I slogan use, but a U die of slogan 10410, West Algoma Agricultural Association, was used in 1914. A U die of flag slogan 4570 was used in 1917, but the office did not have any use of 895. The flag slogan is not available for illustration, but slogan 10410 is illustrated below.

QUEBEC - A U machine was added to the I machine at this office in June of 1913. There had been prior use of I slogan 3160, Exposition Provincials Ds Quebsc, in 1912 and early 1913, but all additional advertising for this event, flag slogan use in 1917 and early 1919 use of 895 continued to be from I dies only. Therefore, there is no early U slogan use from the office.

SASKATOON - A U machine replaced an I in early 1913. There had been no I slogan use, but a U die of slogan 7815, Saskatoon Industrial Exhibition, was issued in mid-1913. A new U die of the same slogan was issued in 1914 and redated in 1915 and 1916. A new U die advertising the Exhibition in a flag format was issued in 1917 and redated in 1918, a U die of flag slogan 7890 was used in 1917 and a U die of 895 was used in early 1919. The total of early U slogans was therefore eight usages from five dies, by far the largest number used by any of the twelve offices. All are available for illustration below.

NIAGARA FALLS - A U machine replaced an I in September of 1913. There had been no I slogan use and the office did not participate in the 1917-18 flag slogan use nor in the use of 895. Its first slogan was the proprietary 2218, Conserve Energy, used from mid-1919 until 1921, so there was no use of Universal slogan dies in the early period.

OTTAWA - A U machine was added to the I machines at this office in October of 1912, the earliest of such additions or replacements. It also received much more use in the early period than that at other offices. The 1912 use of slogan 2555, Dominion Exhibition, was not affected, nor the early 1913 use of slogan 6785, Ottawa Horse Show, but the later 1913 use of slogan 1572, Central Canada Exhibition, was issued in I and U dies, both of which are illustrated to demonstrate the differences in the shape of the top line. Also note that the U dater reads "CANADA" at the bottom, rather than ONT.

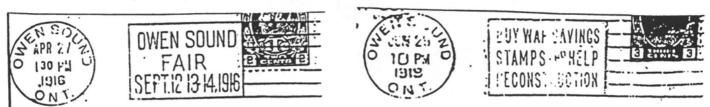

The use of slogan 1572 was probably omitted in 1914-15, due to the outbreak of WW I, but was resumed in 1916 with redated use of the 1913 U die. The 1913 I die may have also been redated, but is not yet recorded. Also, late in the year, a U die of slogan 6895, PATRIOTIC MOTOR SHOW, was issued and retained until early 1917, although no I die of this is recorded. In 1917 the 1572 slogan was again omitted, but a U die of flag slogan 4570 was issued. The 1916 slogan 1572 and 1917 4570 are illustrated below with the daters again reading CANADA below. An actual strike of 6895 is not available.

There was no OTTAWA flag usage in 1918, but slogan 1572 was revived with a redated 1916 U die and a redated version of the possible unrecorded 1916 I die may exist. In early 1919 OTTAWA used an I die of slogan 895, but also had concurrent use of a U die. The 1918 use of 1572 and 1919 use of 895 are illustrated below, the dater still reading CANADA in 1918, but altered to ONT. in 1919.

OWEN SOUND - A U machine replaced an I in August of 1914. There had been no I slogan use, but a U slogan 6805, OWEN SOUND FAIR, was issued in 1915 and redated in 1916. The 1915 use is not available for illustration, but the redated 1916 is illustrated below. OWEN SOUND did not participate in the 1917-18 flag slogans, but a U die of slogan 895 was used in early 1919, also illustrated below.

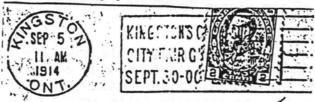

KINGSTON - A U machine replaced an I in October of 1913. There had been no I slogan use, but a U slogan 5143, Kingston's Only Fair, was issued in 1914, a U die of flag slogan 4570 was used in 1917 and a U die of slogan 895 in early 1919, so there was use of three Universal slogan dies in the early period. All three can be illustrated below.

MONTREAL - A U machine was added to the several I machines in 1913, but MONTREAL'S 1914 multi-die use of slogan 1340, Cartier Centenary, was exclusively from its I machines. In 1917-18 MONTREAL had I use of flag slogans 4570, 9741-A and 894, but the U machine was used only for the 1917 flag slogan 9741. MONTREAL's early 1919 multi-die use of slogan 895 was all International, so there was only one Universal slogan die used in the early period, illustrated below.

MOOSE JAW - A U machine replaced an I in August of 1913. There had been no I slogan use, but a U slogan 5800, Moose Jaw Stampede, was issued in 1916, a U die flag slogan 7415 in 1917 and a U die of slogan 895 in early 1919, so there was use of three Universal slogan dies in the early period. Slogans 5800 and 7415 are not available for illustration by actual strikes, but the Flag Cancellation Handbook has a reduced size photo of the very scarce 7415, from the Ray Peters collection, so this is reproduced below, together with an actual strike of the early 895 use.

A number of articles have appeared in this Newsletter pertaining to various aspects of Perfect machine use, and its impact on slogans. However, there has not been a listing of the periods of use by all of the 116 offices that employed these 132 machines, from first issue to their eventual replacement by Pitney-Bowes machines, and including the date and catalogue number of their earliest Perfect slogan use, if any.

Such a listing now seems worth publishing, because the introduction of the Perfect machines in late 1928, gradually replacing almost all of the earlier Universal machines by late 1934, very significantly impacted Canadian slogan use over many years. The Perfect machines could not accommodate any of the many Universal slogan dies in use from 1919, so some major multi-year slogans had to be completely abandoned, while others required the manufacture of new Perfect slogan dies in order to be continued.

Any slogan collector with an interest in dies should appreciate an indication of when the many slogan using offices were forced to give up use of certain slogans, or else forced to employ only dies manufactured from 1930 on. Eventually, the Perfect machines were entirely withdrawn, and all replaced with Pitney-Bowes machines, beginning in 1937 and almost totally completed by early 1956. A few small Quebec offices retained or were issued Perfects in the post-1956 period, but slogan use from these is limited to only a few instances of the slogan "PORQUOIS ATTENDRE AU PRINTEMPS in the 1957-62 period.

The Pitney-Bowes replacement machines could make use of such of the earlier Universal slogan dies as were still retained, as well as new Pitney-Bowes dies issued after 1937, but they could not make use of any of the many Perfect dies introduced from 1930. Therefore, slogan die use normally falls into several distinct periods, as follows. Universal dies only from 1919 to 1930, Universal and Perfect dies from 1930 to 1934, Perfect dies only from 1934 to 1938, Perfect dies plus revived Universal dies and new Pitney-Bowes dies from 1938 to 1956, retained Universal dies and Pitney-Bowes dies only from 1956.

The usage by offices in each period depended on the machine or machines that they had been issued at the time, and this article is intended to indicate when each slogan using office switched from Universals to Perfects, and how long they retained their Perfects until replaced by Pitney-Bowes machines.

The data included comes from hundreds of pages of P.O. correspondence obtained from the Canadian Postal Archives. In spite of the size of this data base, it is by no means totally complete, so some of the information must be approximated by date, while others can be given exactly to the day. The correspondence includes several complete inventories of machines at each office as of the inventory date, but there are sometimes considerable gaps between the dates of these inventories, during which many undocumented replacements probably took place. This is especially true of the gaps between the inventory taken in late 1947 and the next following inventories of July 1954 and November 1957.

In these cases, replacement dates can only be given "as of" the inventory date, indicated by the abbreviation "A/O" following the date. Since one gap is of nearly seven years, it is obvious that several of the dates indicated are possibly incorrect by a number of years, but they represent the best data available.

In the case of TORONTO, and to a lesser extent OTTAWA, WINNIPEG and VANCOUVER, several Perfect machines were retained in storage after the introduction of the Pitney-Bowes, for use as replacements for damaged Perfect machines or for Christmas rush additions in neighboring smaller offices. These instances are indicated in the "comments", but the reserve machines were very rarely used for slogan purposes in the storage office. Both LONDON and WINDSOR each had two Perfect machines, of which only one was initially replaced, so concurrent slogan use from both types exists for limited periods, especially in the case of WINDSOR.

Perfect machine usage, per Archival data.

Documented actual dates are listed without suffix. When usage is indicated only by an inventory listing, the inventory date is suffixed A/O (as of).

TORONTO	29.06.04 29.06.04 29.06.04 29.06.04 29.06.04	800	30.08.14	38.01-06 A/0 38.01-06 A/0 38.01-06 A/0 38.01-06 A/0 38.01-06 A/0	TORONTO was issued five of the first 25 machines available in mid-1929 and a sixth added later. These were replaced and added to by eight newer machines, so that TORONTO had nine machines in use by early 1930. However, like MONTREAL, it was a storage facility for Ontario reserve machines, often having a considerable number on hand in addition to those in use. Some newer 200 series machines were added in early 1932 and in 1935 new series 300 machines replaced almost all of the 100 series machines, which were sent to smaller offices. In 1938 eight rented PB machines replaced all of TORONTO's Perfects, except those retained in reserve for either special use or as replacements. By May of 1938 TORONTO began receiving its eight new Pitney-Bowes Model G machines, and by mid-1939 began to transfer most of its series 300 Perfects to other offices. However, quite a number of Perfects were retained and surplus Perfect machines were sent to TORONTO for storage until required elsewhere. There were six Perfects in reserve there as of Oct. 20, 1942 and nine as of Sept. 26, 1945. Dates of the first issue are listed.

The above old sea-faring term is brought to mind by a slogan spelling error. Incorrect wording, dating or spelling on an issued slogan is quite rare, since one of the main purposes of proofing a die was to ensure that such errors were caught prior to issue of the die to its using office. Nevertheless, human error did manage to prevail in a very few cases.

An unusual instance of this was recently brought to the Editor's attention by Jean-Guy Dalpe, since it was an error in the spelling of a French word. and the Editor's French is not of a quality that would immediately detect such an infraction. The slogan in question is number 27, Acherez Des Timbres D'Economie De Guerre Et Aidez A La Reconstruction. This is the French only version of the 1919-20 English slogan 895, and it was used only at TROIS RIVIERES. The wording "TIMBRES D'ECONOMIE DE GUERRE" translates as "WAR SAVINGS STAMPS".

The slogan had original issue in early 1919 as an International Die, but as with slogan 895, the die was replaced in mid-1919 by a Universal type. The two dies are illustrated below, the International by a Pritchard and Andrews proof and the replacement Universal by an actual strike.

Note that on the replacement Universal die the word "TIMBRES" is incorrectly spelled as "TIMBERS". It can also be noted that the Proulx Catalogue wording of slogan 27 spells "TIMBRES" as on the International die, although not as it actually read on the Universal, but the balance of the wording has two errors. The Catalogue wording is ACHETEZ DES TIMBRES D'ECONOMIE LA GUERRE ET AIDEZ LA RECONSTRUCTION, substituting "LA" for "DE" before "GUERRE" and omitting "A" before "LA RECONSTRUCTION".

A second slogan error, several years later, is not quite so dramatic, but rather more obvious and should have been noted immediately on proofing. This error is in the wording of the Universal die of slogan 4615, HISTORICAL PAGEANT MASSEY HALL, with dates, issued to TORONTO for short usage in 1927 only. It is illustrated below.

Note that the bottom line, with the event dates, reads JUNE 22TH TO 25TH, the ordinal suffix of "22" reading "TH" instead of "ND".

HELP RECONSTRUCTION

Slogan 895

Approximately one third of Issue No. 1 of The Slogan Box was devoted to this slogan, which at the time of its 1919 issue was far and away the most major multi-office slogan usage that had been undertaken. A revision was published in Issue No. 14, but up-dates and a few additions since then suggest that the latest information should again be made available.

Also, the machine usage, involving International, Universal and Columbia dies, can be separated into six groupings and the following article displays these for the first time.

The usage as a whole is really in two parts, the initial issue in early 1919 and the very major re-issue of new dies in mid-1919. The earliest use of the initial issue so far recorded is March 1st at both OTTAWA and MONTREAL, so it seems very probable that this will prove to be the first day of use for any office. It cannot really be determined if all the dies were available for simultaneous issue, or if it took some time to complete the issue, but since it took from hours to days for the dies to be distributed from OTTAWA to the various using offices, it is probable that only those offices with a very near proximity to OTTAWA will be found to have matched that date.

In mid year, most offices switched from International to either Universal or Columbia machines, and such a major change certainly could not have been accomplished simultaneously, so usage of the replacement dies must have been phased over some time. The earliest use of these so far recorded is that of a Columbia die at YARMOUTH on June 2nd. This was not really a replacement die, but rather a first issue, since YARMOUTH had not used the slogan earlier, even though it had an International machine from 1912. The earliest use of a true replacement die is a Universal at FORT WILLIAM on June 5th.

It therefore seems possible that the new replacement Universal and Columbia machines began to come into use from June 1st, but it probably took some time before they were all in place, although at least eighteen offices have recorded replacement use in June.

There is only one recorded instance of what appears to have been overlapping use of both original issue and replacement dies. This was at STRATFORD, where an original issue International die is recorded on August 16th, but a replacement Universal is recorded almost a month earlier on July 19th. This overlap is so great as to appear very improbable, but the strikes are illustrated below. Possibly the very late International use is a dating error, and should be July 16th. Members should check their STRATFORD material to determine if they may also have International usage on or after July 19th.

Universal use dated July 19th

Consolidated Usage Of Nine Air Mail Related Slogans 1929-32 And 1938-48

Slogans 125 - 132 - 3945 - 7875 - 7878 - 7879 - 7879-A - 7880 - 7881

The above are the major Postal Directive slogans pertaining to Air Mail, all having multi-office usage of from several to numerous dies. Three were introduced in 1929-31, with use to 1932, all revived in 1938-39 together with six additional, most having use to 1948.

Few have been classified in "The Slogan Box" itself, since all were included in the special "Handbook of Air Mail Slogans" published by the Study Group some years ago. Various updates have been listed in "The Slogan Box" from time to time since, but even with these updates, further research and additional data has badly outdated the Hand Book. Since these Air Mail slogans are very popular, and certainly included in all collections, a complete revision of the Hand Book would no doubt be welcome.

Meanwhile, however, some interesting data can be immediately made available. By combining and sorting in the computer the revised and updated data on all nine slogans, a consolidated usage has been established and published herein. This omits the relatively few bilingual Air Mail slogan formats, since they were quite minor. The statistical information that this provides is most interesting, the highlights of which are as follows.

There is evidence to strongly suggest that, especially in the 1938-48 period, the P.O. considered this group of variously worded formats, with a unified theme, to be in essence one major slogan. This it wished to disseminate very widely, irrespective of format, so offices were consecutively issued dies of whatever format was immediately available, often trading one die for another, without intermediate use of slogans with a different message.

There are 782 individual usages of the nine slogans in the total period, used by one hundred and one offices. Nineteen of these offices had only one usage, but the other eighty-two divided 763 usages between them, for an average of between nine and ten per office. The highest number recorded by any one office is not surprisingly TORONTO, with 22, since slogans 7879-A and 7881 had multiple dies issued to TORONTO alone, with only one die of each used by other offices.

Note, however, that two much smaller offices, BROCKVILLE and GUELPH, also had 22 usages, BRANTFORD and MOOSE JAW had 21, while CALGARY and TIMMINS had 20 each. It can be seen that seven offices had 148 of 781 total usages, so that from an Air Mail slogan collector's point of view, these seven are the most important. However, none of these offices used more than six of the nine possible air mail slogans.

Careful study of the listing shows only a very few instances of an offices using more than one of the formats concurrently. This occurred to a considerable extent at TORONTO, and to a lesser extent in the multi-machine offices of VANCOUVER, WINNIPEG, EDMONTON and WINDSOR. Of the single machine offices, only NORTH BATTLEFORD clearly used one die each of slogans 7878 and 7879 in late 1941. BROCKVILLE was issued a die of slogan 132 on Aug. 8, 1939 and of slogan 3945 on Aug. 14, 1939, so either the slogan 132 die had very short use, or the two slogans were alternated in the single machine for a few weeks.

The absence of other concurrencies seems to strongly support the assumption that the P.O. considered these nine slogans as simply different formats of one theme, and therefore normally issued only one of them to a given office at a time.
