Scarborough, Ontario, M1P 2P9

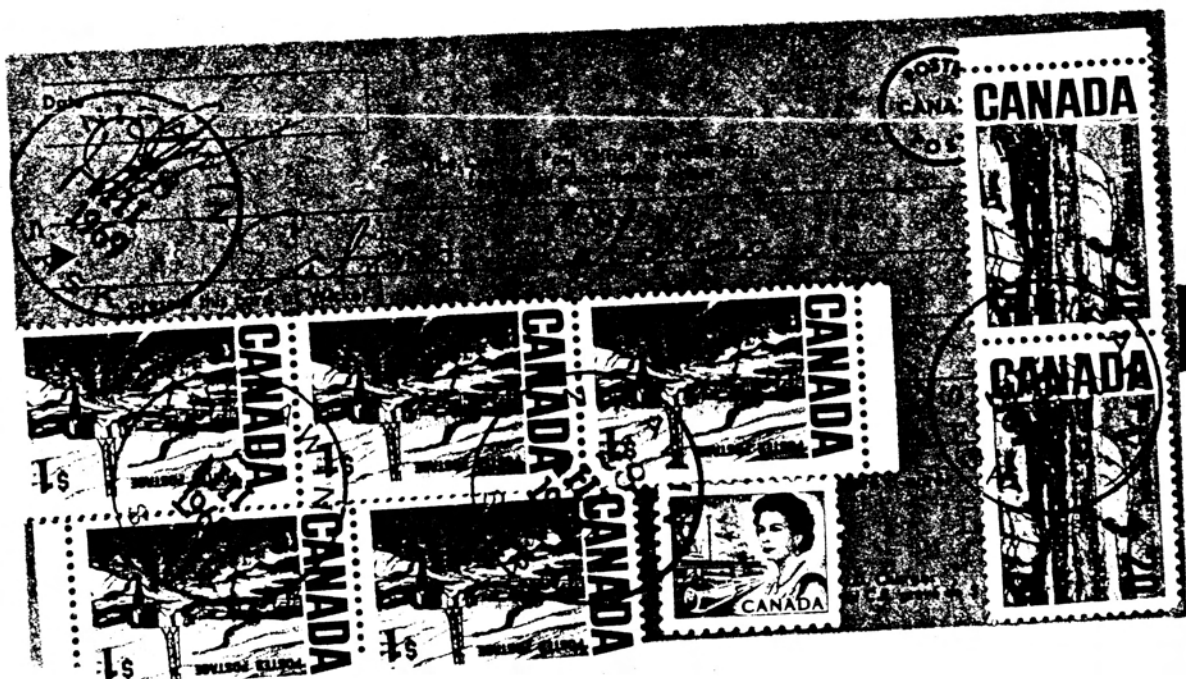

I have had no word yet from either the study group coordinator nor the organizing committee for BNAPEX 86 as to when our study group meeting will be. Unfortunately, there was nothing in the May issue of BNA TOPICS which was just received days ago. However, I still have not heard from any member planning on attending nor have I received any suggestion as to what we should discuss. Your responses to my queries on exhibiting has been just as unencouraging. Do any of our members care what the study group does as long as newsletters keep coming out every two months?

William Thornburgh has sent in an interesting query that perhaps some member can answer in the newsletter. Some Canadian dealers say that hibrite papers can be faked. William would like to know how easy this is to accomplish and can one detect these faked copies. William is particularly interested as to whether anyone has come across faked copies of the 6¢ orange, hibrite, Winnipeg tagged? Anyone with some thoughts on this matter?

\$1 USAGES

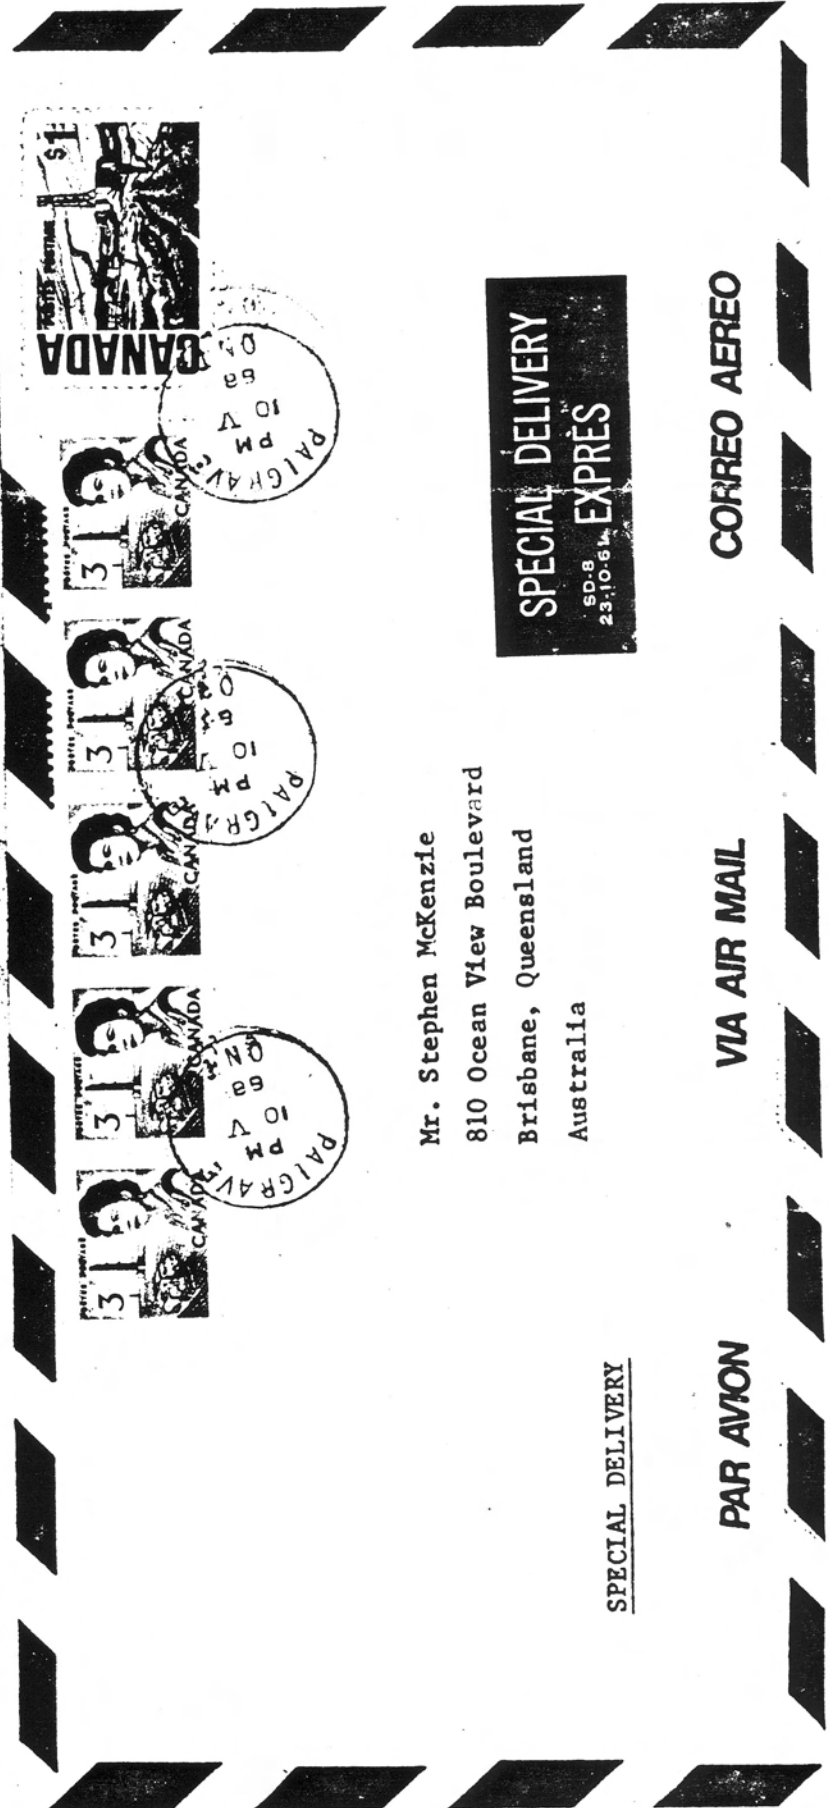

The following usages of the \$1 Centennial have been provided by John Aitken and myself. We would appreciate additional examples from our members, especially the single weight rates such as the \$1 registered airmail special delivery letter rate to the United States and the \$1 registered airmail special delivery postcard rate overseas. Shown are:

1. \$5.46 on Post Office receipt for mailing of Eatons Catalogues
2. \$1 double weight (25¢ + 25¢) registered airmail to Australia
3. \$1.15 triple weight (75¢) airmail special delivery (40¢) to Australia
4. \$1.92 registered first class package
5. \$7.50 for a money packet weighing 5 lb and containing \$15,800.00
6. \$4.05 paying householder mail rate for 135 circulars from the Bay at 3¢ each
7. \$34.40 paying the same householder rate for 1160 items at 3¢ each. Does anyone have a larger usage of Centennial stamps on any item?
