## Online Resources and Exhibits

The *Online Resources and Exhibits* section of the BNAPS website holds an incredible wealth of materials for the Canadian collector. Here is just one example.

### [Constant Plate Flaws on Elizabethan Stamps – Leopold Beaudet](#)

During the Elizabethan period, 1953 to 2022, Canadian stamps were printed by several different methods: engraving, lithography, photogravure, and combinations thereof. This presentation describes the types of flaws produced by each printing method. During the 70-year Elizabethan period, printing methods underwent major changes. The presentation looks at how the evolution of the printing processes affected the types of flaws.

The presentation was given to the Dutch Society for USA and Canada Philately (USCA) in December 2023 and to the BNAPS Elizabethan II Study Group at ORAPEX in May 2024.
