- A discussion of the Montreal hammers can be found in BNAT144-63
- This hammer is curiously uncommon considering the volume of business at this office
- CDS and duplex strikes are often seen on ordinary letter mail, and on registered letters originating in Montreal
- Beginning in 1896, machine (including flags) cancels are common
- Barred circles are found as transit marks on registered mail moving through, or addressed to, the Montreal post office
- A study by Bélisle, reported in RA-131, conclusively demonstrates that the Montreal Type 2, Hammer 1 (and not the Type 2, Hammer 2) was modified by removing the rim lettering to produce a Squared Circle precanceling device that was used after JA/03 (the LRD of Hammer 1)
- Examples are known on 1c Numerals and 1c Edwards (issued JY 1/03) RA-131

- The 5 known strikes carry a time mark of 3PM (separated in the top and bottom indicia slots) but no year date
- This indicia pattern was common in the Montreal post office until the spring of 1894 and is seen on duplex and CDS postmarks of the period
- A discussion of the Montreal hammers can be found in BNAT144-63
- A report in RA-87 suggests that a partial undated strike on a 1c SQ (possibly a nude), with possible precancel use, was consistent with Hammer 2
- However, a study by Bélisle, reported in RA-131, conclusively demonstrates that the Montreal Type 2, Hammer 1 (and not the Type 2, Hammer 2) was modified by removing the rim lettering to produce a Squared Circle precanceling device that was used after JA/03 (the LRD of Hammer 1)

Hammer Damage: the inking of the hammer influences the appearance of the breaks outlined below, suggesting that they were not very deep and making it difficult to establish precise timelines

| Date | Comments/Reference |
|--------------------|---|
| AM/MR 2/97 | <ul style="list-style-type: none"> • Top right corner of hammer broken and not printing • LRD for unbroken hammer FE 3/97 • ERD for broken hammer on a 1c QV postal card STK1-3238 |
