- Strikes are usually partial, eg. 'NIERE', and undated
- Partial strikes containing only '...RE' can be mistaken for ST. GREGOIRE (for an example of this mis-assignment on the Map stamp, see RA-123)
- An accumulation of about 17 covers (receiving marks all addressed to the same family with dates 1896-1901) appeared on eBay and was reported in RA-113
- A single collector has reported 29 covers in his collection, some of which are part of the 17 cover accumulation
- Therefore, the exact number of covers is unknown

## MONTREAL, QUE, HAMMER 1

Strikes Off-Cover: 459

Strikes On Cover: 37

Rarity Factor (RF): 25

### Proof Date and Periods of Use:

Period	Earliest Date	Latest Date	Comments/Reference
Proofed	-/JU 28/93		Use overlaps with that of Hammer 2 which was used for 2 days in JA/94
1	-/JY 15/93	<b>5/JA 26/03</b>	<ul style="list-style-type: none"> <li>• ERD: HB5</li> <li>• LRD: on a 1c QV stationery cover uprated with 2X1/2c Numerals STK1-3220</li> <li>• Note that this cover is reported as 5/JA 25/03 in RA-52</li> </ul>

- A discussion of the Montreal hammers can be found in BNAT144-63
- This hammer is curiously uncommon considering the volume of business at this office
- CDS and duplex strikes are often seen on ordinary letter mail, and on registered letters originating in Montreal
- Beginning in 1896, machine (including flags) cancels are common
- Barred circles are found as transit marks on registered mail moving through, or addressed to, the Montreal post office
- A study by Bélisle, reported in RA-131, conclusively demonstrates that the Montreal Type 2, Hammer 1 (and not the Type 2, Hammer 2) was modified by removing the rim lettering to produce a Squared Circle precanceling device that was used after JA/03 (the LRD of Hammer 1)
- Examples are known on 1c Numerals and 1c Edwards (issued JY 1/03) RA-131

### Time Marks/Arrangement: normal date arrangement

- TM abundance reported in HB5 (based on 112 strikes): 5 = 39, 6 = 38, blank = 18, 7 = 14, 2/4/8? = 1 each
- Another study (based on 71 strikes) shows: 5 = 28, 6 = 19, blank = 16, 7 = 5, 15 = 1, inverted 5 = 2

- The 5 known strikes carry a time mark of 3PM (separated in the top and bottom indicia slots) but no year date
- This indicia pattern was common in the Montreal post office until the spring of 1894 and is seen on duplex and CDS postmarks of the period
- A discussion of the Montreal hammers can be found in BNAT144-63
- A report in RA-87 suggests that a partial undated strike on a 1c SQ (possibly a nude), with possible precancel use, was consistent with Hammer 2
- However, a study by Béglise, reported in RA-131, conclusively demonstrates that the Montreal Type 2, Hammer 1 (and not the Type 2, Hammer 2) was modified by removing the rim lettering to produce a Squared Circle precanceling device that was used after JA/03 (the LRD of Hammer 1)
