

PREPAID PARCEL LABELS

Thanks to Pierre Gauthier, Chris Ryan, Mike Street and Yan Turmine for help with this section.

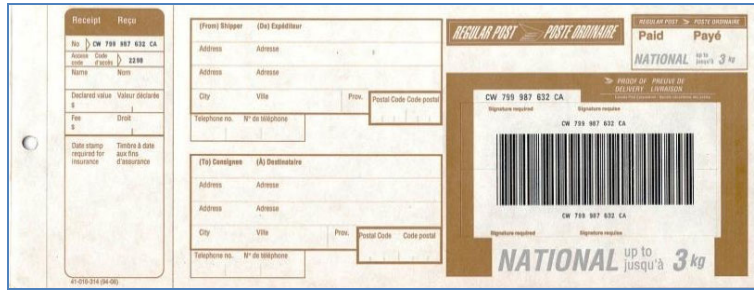

In the late 1980's the Post Office quietly introduced a number of payment options for parcels. Most of these have only been available to larger volume mailers through commercial representatives. Many more types or more likely "values" within the known types will continue to be found. In addition to the items for use by retail users, a number of items have appeared for use by the Provincial Governments and /or their agencies in Ontario, Quebec and Alberta.

Those for non-governmental use were for Regular, Expedited or Xpresspost service. Many of these labels were printed on demand in quantities as small as 50.
