Editor's Post:

§ Jon Johnson hosted a Perfin seminar group at BNAPEX in Niagara Falls in August and provided the following report.

The seminar attracted 14 attendees. First, everyone introduced themselves and what their collecting interest was. It was mentioned that dues would not be required as the Perforator bulletin is issued electronically. There was a brief discussion on the Fifth Edition e-handbook. Garfield Portch with the Vinnie Greene Foundation mentioned that the Foundation has acquired the fake OH/MS perforation reference collection built by Gary Tomasson and Jon Johnson. With this collection and their new VSC6000 (visual spectral comparator) machine the Greene Foundation will issue certificates for OH/MS perfins.

After the discussion, the chairs were moved into a circle and a lot of very nice material was handed around the circle.

§ And speaking of face to face, between last issue and this I had the distinct pleasure of meeting 2 Study Group members face to face. In August Barry Senior stayed over in Dartmouth on his way home to Newfoundland from the annual US Perfin/Precancel event which was held this year in Boxborough Massachusetts. And at the beginning of this month a work related visit to Montreal coincided with FILEX which was held across the river in Boucherville. Jean Guy Dalpè kindly stayed an extra day and we spent a very pleasant hour or so on Sunday morning.

I am very appreciative of these opportunities to put a face to a name and make our shared hobby a little more personal.

§ Jon also reports that the Canadian Stamps with Perforated Initials, Fifth Edition was entered in the Literature Class at the Singapore International Stamp Show. It won an International Silver medal. Congratulations to Jon and Gary for this well deserved recognition of all of the years of effort they have selflessly dedicated to the cataloguing and promoting Canadian perfins.

§ I mentioned in the last issue that my article on the Great West Life pattern G16, which is currently listed as being from Detroit, was published in the Perfins Club's March/April Bulletin. Unfortunately it did not elicit any further information.

§ There was a generally favourable reaction by those who responded to the suggestion that material be circulated to the Study Group members with email and then later consolidated in an issue of the Perforator. This is the first issue that will repeat articles already circulated to Study Group members by email. In addition to keeping our members without email up to date, each issue of the Perforator will eventually be added to the BNAPS library and available to all Canadian perfin collectors in the future.

§ There were 11 responses to the suggestion that the Perfin Study group lift the 5 year embargo and include current issues of the Peforator on the BNAPS website. There were 7 responses that simply stated their

agreement with the suggestion, one in agreement if the embargo was lifted for paid-up BNAPS members only, and 3 opposed. Those opposed were most eloquent and united in their reason— a 5 year embargo is not unusual with many philatelic societies and paid-up members should receive more of a benefit from their membership than those who are not. It was mentioned that this is also the view of the BNAPS Board of Directors which is opposed to lifting the embargo. My humble opinion is that a 11% “yes” vote, seven of a possible 65 (those with email), is not enough of a

consensus to change the current practice, so for now at least things will remain as they are.

§ Jean-Guy Dalpè had something special for me to see during our visit at FILEX— a Cummins Model 52 perforator. It is the P6 pattern of the Parke, Davis & Company from Winnipeg. When the Company closed its Winnipeg operations, the machine moved to the Walkerville Ontario plant. A nephew of Conrad Tremblay who worked for Parke Davis offered it to him and from Conrad it has passed to Jean-Guy. A respectful collector, Jean-Guy will not be perforating stamps. Here is the 5 die P6 pattern punch.

Private Perfin on Canadian Booklet Panes

Leopold

Beaudet

Perfin stamps from booklets are very rare, so a collector who discovers a perfin on a straight-edge stamp might understandably experience an adrenaline rush. Before getting too excited about such a discovery, the collector should remember that many Canadian stamps issued in sheet format also come with straight edges. Is there a list of such stamps? Can you determine whether a straight-edge stamp comes from a booklet or a sheet?

A listing of straight-edged stamps does exist, at least for stamps issued before 1971. The list was published in 1971 in a 15-page handbook, *Canada Part Perforates, first edition, by Robert A. Lewis*. The booklet is long out-of-print, but might show up in the stock of dealers who handle philatelic literature.

The second question isn't too difficult to answer, even without the benefit of the Lewis handbook which might be difficult to find, because the list of straight-edged stamps issued in both sheet and booklet format is quite small. The list includes:

1911 Admiral issue: 1¢ green, 1¢ yellow, 2¢ carmine, 2¢ green, 3¢ brown, 3¢ carmine. All Admiral sheet stamps exist with straight edges, but the above six were the only ones also issued in booklet format. Note that it is possible to distinguish between most but not all Admiral sheet stamps with straight edges and their booklet stamp counterparts as explained by Randall W. Van Someren in an article on the BNAPS website. See:

<http://www.bnaps.org/ore/VanSomeren-AdmiralStamps/VanSomeren-AdmiralStamps-StraightEdge.htm>¹

1928 Scroll issue: 1¢, 2¢, 5¢. I believe sheets of the all the Scroll stamps were issued with straight edges.

1954 QE II Wilding issue: 5¢ (the “sheet” stamps are from miniature panes in cello paqs).

1962-63 Cameo issue: 4¢, 5¢ (miniature panes).

1967 Centennial issue: 4¢, 5¢ (miniature panes).

1967 Centennial issue: 6¢ orange perf 10 x 10 and 6¢ black die I and die II perf 12.5 x 12.

If you come across a perfin on a straight-edged stamp, what should you do before permitting yourself an adrenaline rush? Go to the *Unitrade Specialized Catalogue* to see whether the stamp was ever issued in booklet format. If it was AND it is not in the list above, then you can celebrate! If it was, but it is in the list, unfortunately you may have a difficult time proving the stamp comes from a booklet rather than a sheet or miniature pane.

1. You will note that the latter reference provided by Leopold is to the BNAPS website. I would suggest that any Study group member who believes there is a perfin'd booklet pane stamp in his/her collection visit this BNAPS website and see if this can help you confirm that this is what you have. [Editor]

These two wonderful covers were sold in Eastern Auction's September sale. Both covers fetched prices just a little less than \$2000.

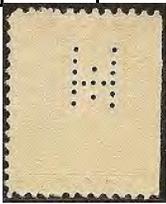

1st September 2015 changes to the 5th Edition of the Canadian Stamp with Perforated Initials.

	#1	Change stamp number 163i to 163b

An E4 "Eby-Blain Co. Ltd." on Cover

Russell D. Sampson

The illustration here shows a rather attractive advertising cover recently purchased by the author from an eBay dealer in England. It's franked with an early usage of the 2-cent carmine Admiral (Scott #106) but more importantly it sports a B-rated perfin from the grocery wholesaler, importer and manufacturer *Eby-Blain, Limited* of Toronto. The machine cancel is dated MAR 22 1912. This is only about eight months earlier than the sole reported date of the E4 in the 5th Edition of the perfin catalogue (1912/11/18). Thus a date-range for this perfin, albeit a relatively short one, has now been established. The other illustration shows a single Scott #89 with the pattern, also from the author's collection.

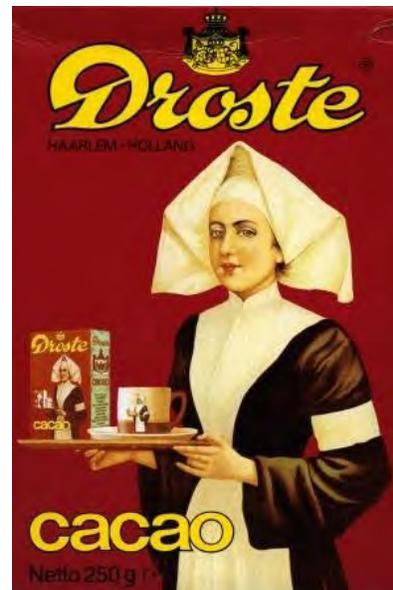

The cover is back-stamped LONDON E.C. / 4.15 PM / APL 312E thus taking 12-days to reach London. The postage is the 2-cent Empire rate (Imperial Penny Post), which was in effect from December 25, 1898 until April 15, 1915 when it increased to 3-cents.

The history of this Canadian wholesaler was outlined by Jim Black in a past issue of the *Perforator* [Volume 36 No.1]. It is interesting to note that in early publications the company's logo had the founder's names separated with a comma. This illustrated cover shows the two names separated with a hyphen – just like in the perfin. From an Internet search for images related to the company, it appears that sometime between 1904 and 1908 the logo changed to the hyphen. However, the fact that the pattern supposedly has appeared on a Scott #75 (1-cent Numeral Queen Victoria – 1898 to 1902) would suggest the transition might have occurred earlier or in a rather haphazard fashion.

The addressee "Messrs Droste & Co." is most likely the famous Dutch cocoa company which at the time had a branch office in London.

By the way, this company is also famous for a graphic arts effect, now called the "Droste Effect". If you have ever had a box of this cocoa (and I have), you may know what this means. On the box is a picture of a 19th century nurse holding a tray with hot cocoa in a cup and next to the cup is a picture of a box of Droste. On that box is the same picture, and so on, and so on ... and so on. This mirrored picture within a picture is now called the Droste Effect.

I was lucky enough to purchase a real find just before the storm-induced blackout of the 2015 Precancel/Perfin Convention at Boxborough, Massachusetts. It was a C-rated N26 on a Scott #90 from John Randall's impressive Canadian perfin collection. This pattern had an unknown origin and was one of only about 10 patterns still unidentified in the 5th edition of the catalogue. Upon close inspection, the specimen has a faint cancel that appears to be a Cloutier DMB-396 duplex from Winnipeg [1], dated October 1903 (O(C), 03). Another N26 (on Scott #93) from my collection has a partial CDS cancel that could now be more positively identified as coming from Winnipeg (see Figures 1 and 2).

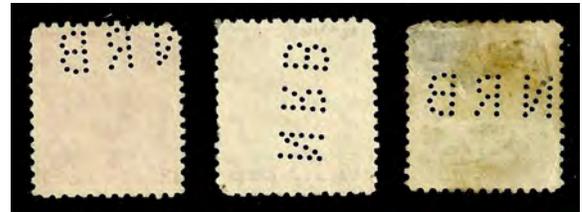

Figure 2

A search of the online 1903 Henderson's city directories for Winnipeg [2] revealed the firm of **Nares, Robinson & Black**. Further examination of the Henderson Directories determined that the company by that name was in existence from 1900 to 1907. This period coincides with the recorded stamp issues with the N26 pattern (Scott #77, 77a, 89, 90 and now my 93). The company advertised itself as a "Real Estate, Loan and Insurance Agency". They were located at 381 Main Street on the corner of Lombard, which eventually became known as the Nares Block (Figure 3).

OFFICE, NARES BLOCK, 381 MAIN ST.
TELEPHONE No. 5120

Figure 3

Figure 4

Llewelyn Arthur Nares (see Figure 4) left Dominion Mortgage Co. in 1900 and joined forces with Edward Milward Robinson [3] and George Montegu Black to complete the NRB group. George M. Black is none other than the grandfather of Conrad Black, one of Canada's most famous modern financiers [3].

The NRB perfin disappeared around the same time that Nares left the company and moved to California in 1907. There he made a fortune on real estate and patents [3]. The remaining partners continued the Winnipeg operation for a few more years under the name Robinson & Black (see 1909 cartoons [4], Figures 5 and 6). In 1911 an ignominious event befell the once proud NRB The Nares Block collapsed when its foundations were undermined during construction of an adjacent bank [5].

Figure 5

Figure 6

Nares became a bit of financial celebrity in California and appears to have built the first mansion in Beverly Hills in 1907-08. The home was on Knaresborough Drive (note the name), which is now Alpine Drive [6,7]. He also has a town near Fresno named after him - Lanares, California [8]. Nares was an early motoring enthusiast and set a record for travel between Los Angeles and San Francisco – just over a day. His hobby was also the source of his demise, as he died in 1939 of injuries re-
