## 1. General Introduction

This publication provides a census of covers franked with the Canadian 8¢ Small Queen issue of 1893 and postmarked with Squared Circle hammer strikes. As far as I am aware, this is the first cover census of this issue.

The Squared Circle hammers were issued to over 300 towns and RPO's starting in April 1893.<sup>1</sup> The 8¢ Small Queen was issued in August 1893 and its primary intended use was to pay the first class mail rate (3¢) plus registration (5¢). Since the 8¢ Small Queen was used until the 8¢ Leaf and Jubilee issues became available in 1897-1898, the use of the Squared Circle hammers overlapped nicely with the use period of the 8¢ Small Queen. However, the limited use of the 8¢ Small Queen to registered mail (and other heavier or bulk mail) has contributed to a relative scarcity of Squared Circle postmarked covers compared to, for example, Squared Circle postmarked 3¢ Small Queen covers.

The first checklist of Squared Circles known to exist on 8¢ Small Queen stamps and covers appeared in Appendix C of Gordon's 2001 5<sup>th</sup> edition of the BNAPS Squared Circle Handbook, *The Squared Circle Cancellations of Canada*.<sup>1</sup> There was no population report associated with this checklist and no effort was made to distinguish covers from off-cover stamps. I started compiling data for this census while researching similar information on Squared Circle postmarked Map stamp covers.<sup>2</sup> As in that study, source materials for this census were public auction listings, internet auctions (such as eBay), philatelic literature (including books and journals), exhibits, dealer stocks, and numerous personal communications from collectors of 8¢ Small Queen stamps and covers. Special thanks are given to Bill Radcliffe who encouraged me to undertake this study even though I do not collect this issue. It has been an educational and rewarding experience. Thanks are also given to Laurent Bélisle, Steve Bloomer, Brian Copeland, Jack Forbes, David Robinson, Guillaume Vadeboncoeur and Eugene Yount for their contributions to the database, including the generous provision of images of the covers in their collections.

### 1.1 Introduction to the Census Tables

The census in **Section 2** is organized according to hammer Type, with the Type 2 hammers ordered by province/RPO as in the handbook. The list of covers in the census is arranged alphabetically by town, and then by date of the Squared Circle strike, with 'undated' strikes preceding the dated ones. Hammers not documented on 8¢ Small Queen covers have been omitted. A population report summary table can be found in the **Appendix**.

For each cover (covers are considered to be complete envelopes, postal stationery, cover fronts, government-issued postal cards, private post cards, but not pieces or partial cover fronts lacking origin or destination information), all of the available information about the cover is tabulated (franking, postmarks, advertising, and addressee/destination). Where possible, the information was extracted from the cover image. Unfortunately, early auction catalogues tended to overlap low resolution images of multiple covers on a page in order to save space. Typically, only the stamp/cancel of interest was illustrated rather than the whole cover, and they invariably lack addressee information. In these instances, and in the absence of an image, the cover details were obtained from the published auction listings or were supplied by the current owners. A number of the reported covers bear Squared Circle postmarks from 2 or 3 different hammers and a description of the cover can be found under each hammer listing. The current number of covers in the census is 489 from 184 different hammers.

This listing can only be considered a work in progress. I encourage collectors who have 8¢ Small Queen Squared Circle postmarked covers to advise me of their holdings (a scan would be preferable if available) so that updates to the database can be made. I hope the census will continue to expand - for new submissions or corrections and updates to the census lists, the author can be contacted by email at: rickfriesen5@gmail.com.

## 1.2 How to Read the Census Tables

The columns in the cover database tables include:

1. **Description & Reference:** detailed descriptions of the covers appear under the following sub-headings:

### (a) Squared Circle Postmark

- **SC Hammer:** the town/RPO name in the Squared Circle hammer followed, in parentheses, by the use type of Squared Circle postmark found on the cover (cancel, dispatch (free-strike(s) on cover front, may also include a dispatch backstamp(s)), transit (typically a backstamp), receiver (typically a backstamp), or an unknown/unreported postmark type). The Squared Circle strikes on covers that bear strikes from 2 or 3 different hammers are highlighted in yellow.
- **Date:** date of the Squared Circle postmark, typically listed by the 3-line indicia TM/MM DD/YY. A '?' in an indicia listing is an unreadable entry (for example, -/? 25/99 is the 25<sup>th</sup> day of an unknown month in 1899; -/FE 2?/99 is the 2?<sup>th</sup> of February in 1899; -/FE (3?)/99 is possibly the 3<sup>rd</sup> day (could be another day) of February 1899). A '-' notation means that the letter/number is off-cover unless it refers to the time mark in which case it is the normal 'not used'

notation. Covers that have Squared Circle postmarks with interesting indicia or indicia errors are highlighted in blue.

### **(b) Stamps and Cancellation**

- **Franking**: a description of the stamp(s) making up the franking
- **Cancel**: a description of the canceling postmark(s) (SC = Squared Circle, CDS, split circle, duplex, flag, etc). The classification/nomenclature systems used to describe the various types of postmarks that are observed on the covers, in addition to the Squared Circles, are found in the following references: split circle,<sup>3</sup> RPO,<sup>4</sup> and barred circle.<sup>5</sup>

### **(c) Details of Envelope**

- **Advertising**: descriptions of the corner cards and/or cover/backflap advertisements, illustrations
- **Addressee/Destination**: the addressee & address (as written on the cover) or the destination city/country. A lack of manuscript legibility may lead to errors in the reporting of names.
- **Postmarks on Front**: postmarks, other than the canceling strike(s), on the cover front
- **Backstamp(s)**: where available, backstamps, typically transit or receiver postmarks, are described

### **(d) Notes & References**

- **Notes**: other interesting information about the cover, stamp or cancel is noted, such as a description of the envelope if other than standard (such as legal sized), an incorrect auction catalogue listing, or an indicia error. The postage amount on the cover (usually in ¢) and the rate it paid is included if it is not the standard 8¢ first class registered rate to destinations in Canada or the USA.
- **Reference(s)**: the source(s) of the census entry is listed, such as auction, literature, exhibit or a personal communication from the 'current owner'. The full auction catalogue listing for the cover is provided if available and if it contains information other than just the indicia of the Squared Circle postmark. If there are multiple references, the reference which is the source of the image is noted as **(Image)**.

2. **Image**: an image of the cover is shown if available. Partial black and white images of the cover front or back are typically from early auction catalogues which tended to have low resolution pictures of covers with overlapped images, and presented only the portion of the cover

containing the 8¢ stamp and postmark. If no image of the cover is available, this is indicated by 'No image available'.

## 2. The Census of 8¢ Small Queen Covers with Squared Circle Postmarks
