The month and day indicia of this *unique Admiral Period strike* were placed in reverse order, with the day preceding the month. This arrangement was also used sporadically in 1897 and 1898 and throughout 1899.

The hammer's initial period of use was from June 1894 through August 1900. In addition to the one day Admiral Period use, a revival of the hammer has been reported from September 16th to October 10th, 1946.

During the Admiral Period, the Rockton, Ontario hammer was used both as a free strike dater, in conjunction with barred obliterator and as a combination dater/obliterator.

Strikes in 1912 and 1913 were placed as combination dater/obliterators. Beginning in 1914, originating cancel strikes were placed as free strike daters, in conjunction with a circular killer.
